Jump into your next adventure

Why Lutron?
- Tackle interesting problems every day
- Do things that actually matter
- Develop your career
- Create solutions that save energy
- Expand the Internet of Things

Join the future of light control
At Lutron, we’ve been designing and manufacturing energy-saving light control solutions since 1961.

We’re looking for ambitious leaders to work on smart home solutions that change the way we live.

To learn more about opportunities for Engineering, Science, and Business majors visit: careers.lutron.com

The Engineering Career and Student Development Center is here to help prepare students for career and professional opportunities and to provide a place where engineering students, faculty, and employers can meet and develop mutual and beneficial relationships.

Planning for your engineering career is key to being prepared when opportunities for internships, co-ops, and jobs arise. The Career Center offers workshops for resume and cover letter writing, career fair preparation, and interview skills. Located in Marston 114, the staff provides sample resumes, cover letters, and other resources to assist you as well as one-on-one counseling M-F, 8:30-5:00.

Throughout the year they hold a variety of corporate information sessions for companies such as ExxonMobil, AbbVie, CDM Smith, Cisco, General Dynamics and Pratt & Whitney. They also work closely with companies to organize networking events, workshops, and plant tours. When you are ready to gain relevant engineering experience, check out the UMass Engineering job board and the UMass Career Services CareerConnect searchable job database which includes internship, co-op, and full-time positions.

College of Engineering

ENGINEERING CAREER & STUDENT DEVELOPMENT CENTER
MARSTON 114, Monday – Friday, 8:30 AM – 5:00 PM
http://engineering.umass.edu/current-students/career-development

“The Engineering Career Center helped me transition from a student to a professional, paving the way for two summer internships and ultimately an exciting job that matches my personality, skill set, and career interests. The Career Center’s friendly student and professional staff were there to guide me every step of the way, from completely re-writing my resume to editing drafts of cover letters and helping me develop and later polish my interview skills. In addition to personal development, they provided numerous opportunities for me to seek jobs and expand my professional network through career fairs, company information sessions, networking events, and weekly emails detailing job opportunities. I can confidently say that the Engineering Career Center gave me an advantage while in school and as I start my professional career, and all UMass Amherst students should capitalize on this amazing resource.”

— Tim Light, Langan Engineering

On the cover: Group photo of UMass alumni participants in the 2015 Engineering Networking Night.
The Engineering Career Center works closely with UMass Career Services to host around 90 companies at the Engineering, Sciences and Technology Fair in the fall. In the spring, students can attend the Career Blast Campus-Wide Fair and the Diversity Career Fair. Engineering students also have access to other services provided by UMass Career Services, including workshops and networking events. UMass Career Services maintains an interactive, searchable job board which allows students to search for jobs all over the country as well as international opportunities. The site, called CareerConnect, has been improved and the new system includes an easy to use directory of employers seeking UMass students and graduates, and company-specific positions, information sessions, resume deadlines and on-campus interviews.

CareerConnect Job, Internship & Co-op Database—How to Log In:
The UMass Amherst CareerConnect job and internship database is now easier to log onto and use!

- Go to: www.umass.edu/careers
- Click on the CareerConnect button on the right-hand side of the page
- On the next screen enter your UMass Net ID and password
- First-time users must complete a quick and simple registration

For assistance, contact UMass Career Services at 413-545-2224

We would like to say a special thank you to New England Wire Products for their support.

INNOVATION DRIVES OUR SCIENCE.
HUMANITY DRIVES OUR PURPOSE.

To address healthcare challenges across the world, we unite a biotech spirit with the strength of a successful pharmaceutical business. The result is a biopharmaceutical company combining science, passion, and expertise to improve health and healthcare in new ways. Making a remarkable impact in people’s lives is more than our promise. It’s our purpose.

abbvie.com
As you progress through your college career, it is important to develop your professional skills and to participate in career-related events. The following is a suggested timeline of specific activities and tasks that will help you to reach your engineering career goals.

**READ YOUR EMAIL** from the Engineering Career Center. We will send you information about specific jobs, fairs, networking events and workshops on a regular basis.

### First Year
- Attend company information sessions to learn more about the various engineering careers and begin to build relationships with recruiters.
- Assess and develop your skills in critical thinking, problem-solving, communication, and teamwork through both academic and extracurricular activities. Take initiative to start a project and see it through to completion.
- Begin your resume—attend a resume workshop.
- Begin building a network of support through friends, mentors, upperclassmen, staff, and faculty.
- Work hard in your academic classes—companies often base internship offers on student grades.
- Plan a related work experience for the summer between your first and second year. While a research position or an internship would be ideal, other experiences can also be useful. For example, if you are a civil engineer, look for a construction or landscaping job. If you are a mechanical engineer, jobs in manufacturing or at the hardware store could prove helpful.

### Second Year
- Update your resume—add any relevant experience or soft skills that you gained over the previous semester or summer.
- Attend company information sessions to learn more about what companies in your field of interest are doing.
- Attend the Engineering Career Fair in the fall and the Campus-Wide Fair in the spring.
- Attend various workshops on resume writing, interviewing, networking or career fair preparation to hone your skills.
- Join and participate in engineering student societies or other student organizations or community service.
- Check out the National Science Foundation’s website: [www.nsf.gov/crssprgm/reu/](http://www.nsf.gov/crssprgm/reu/). Make a list of REU program sites you are interested in and plan to apply (note deadlines!)
- Ask faculty for letters of recommendation for REU applications.
- Explore internship opportunities through the College of Engineering Career Center job board and the UMass Career Services job board called CareerConnect.

### Third Year
- Update your resume.
- Attend various workshops EARLY in the semester so that you will be prepared for the career fairs.
- Attend the Engineering Career Fair in the fall and the Campus-Wide Fair in the spring.
- Attend company information sessions and begin thinking about the type of work you would be doing for a company, the company culture, ability to gain and utilize a variety of skills, as well as the company locations.
- Check out the National Science Foundation’s website: [www.nsf.gov/crssprgm/reu/](http://www.nsf.gov/crssprgm/reu/). Make a list of REU sites you are interested in and plan to apply (note deadlines!)
- Ask faculty for letters of recommendation for REU applications.
- Explore internship opportunities through the College of Engineering Career Center job board and the UMass Career Services job board called CareerConnect.
- Continue to participate in student societies and organizations—begin to take on leadership roles.
- Attend the Graduate School information session and talk with faculty advisors or College of Engineering Career Center advisors to help make this decision.
- If you decide on graduate school, set up a timeline for studying and taking the GRE, LSAT, or GMAT and for meeting all grad school deadlines.

### Fourth Year
- Polish your resume.
- Attend various workshops to fill any gaps in interview or networking skills, job-search techniques, etc.
- Attend the Engineering Career Fair in the fall, the Campus-Wide Career Fair in the spring, and all information sessions. Make sure you know what recruiters are looking for and be prepared to present your technical and communication skills at these various events.
- Regularly check the Engineering job board and UMass CareerConnect for new listings.
- Follow up with companies you meet at information sessions, career fairs, or interviews. Make sure you present yourself in a professional manner—through phone conversations, email, thank-you notes, or in person.
- Prepare to take the FE exam before leaving school—many companies require this for employment. The FE is now a computer-based exam that is administered year-round by NCEES (National Council of Examiners for Engineering and Surveying) at NCEES-approved test centers. Advance registration is required and is available at [http://ncees.org/exams](http://ncees.org/exams).

---

**CAREER CHECKLIST**

---

http://engineering.umass.edu/current-students/career-development
DO WORK THAT MATTERS.

LET’S CHANGE THE WORLD TOGETHER.

We believe that there's no better way to get the job done than to be part of a team determined to change the world for the better. Be challenged with meaningful work in an environment that offers limitless growth through:

- Internships and Co-ops
- Entry-level Opportunities
- Rotational Leadership Development Programs

Discover countless opportunities in Information Technology, Engineering, Product Development, Finance, Sales, Customer Service, Marketing, Supply Chain, Human Resources and more.

Find out how you fit in at Verizon.com/campus

Verizon is an equal opportunity and affirmative action employer M/F/Disability/Vet.

GETTING THE MOST OUT OF A CAREER FAIR

Many employers use career fairs—both on and off campus—to promote their opportunities and to pre-screen applicants. Career fairs come in all shapes and sizes, from small community-sponsored events to giant regional career expositions held at major convention centers. Most career fairs consist of booths and/or tables manned by recruiters and other representatives from each organization. For on-campus events, some employers also send alumni recruiters and other representatives from each organization. Large corporations and some government agencies have staffs who work the career fair “circuit” nationwide.

An employer’s display area is also subject to wide variance. It could be a simple table with a stack of brochures and business cards and a lone representative or an elaborate multimedia extravaganza with interactive displays, videos, posters and a team of recruiters.

Fashions and Accessories

Generally, the appropriate attire for career fair attendees is “business professional”. For women, this can be a career style dress, skirt or pants suit, and dress shoe. Men can wear a blazer with dress pants or suit with a button down collared shirt, tie and dress shoes. Think clean, pressed, and conservative!

Remember to bring copies of your resume (or resumes, if you have several versions tailored to different career choices), a few pens and pencils (have backups—they have a way of disappearing), a folder or portfolio and some sort of note-taking device (paper or electronic pad). Keep track of the recruiters with whom you speak and send follow-up notes to the ones who interest you.

Stop, Look and Listen

Keep your eyes and ears open—there’s nothing wrong with subtly eavesdropping on the questions asked and answers received by your fellow career fair attendees. You might pick up some valuable information, in addition to witnessing some real-life career search “do’s and don’ts.”

In order to maximize your career fair experience, you must be an active participant and not just a browser. If all you do is stroll around, take company literature and load up on the ubiquitous freebies, you really haven’t accomplished anything worthwhile (unless you’re a collector of key chains, mousepads and pocket flashlights). It is essential to chat with the company representatives and ask meaningful questions.

Here’s a great bit of career fair advice from Stanford University’s Career Fair guide:

“Create a one-minute ‘commercial’ as a way to sell yourself to an employer. This is a great way to introduce yourself. The goal is to connect your background to the organization’s need. In one minute or less, you need to introduce yourself, demonstrate your knowledge of the company, express enthusiasm and interest and relate your background to the company’s need.”

You’re a Prospector—Start Digging

The questions you ask at a career fair depend upon your goals. Are you interested in finding out about a particular career field? Then ask generalized questions about working within the industry. If you’re seeking career opportunities with a specific employer, focus your questions on the application and interview process, and ask for specific information about that employer.

Fair Thee Well

By all means, try to attend at least one career fair before beginning your formal job interviewing process. For new entrants into the professional career marketplace, this is a good way to make the transition into “self-marketing mode” without the formality and possible intimidation of a one-on-one job interview. It’s an opportunity that’s too valuable to miss.

A Few Words About Career Fair Etiquette

1. Don’t interrupt the employer reps or your fellow job-seekers. If someone else is monopolizing the employer’s time, try to make eye contact with the rep to let him or her know that you’re interested in speaking. You may be doing a favor by giving the recruiter an out. If all else fails, move to the next exhibit and plan to come back later.

2. If you have a real interest in an employer, find out the procedures required to secure an interview. At some career fairs, initial screening interviews may be done on the spot. Other times, the career fair is used to pre-screen applicants for interviews to be conducted later (either on campus or at the employer’s site).

3. Sincerity always wins. Don’t lay it on too thick, but don’t be too blasé either. Virtually all employers are looking for candidates with good communication skills.

4. Don’t just drop your resume on employers’ display tables. Try to get it into a person’s hands and at least say a few words. If the scene is too busy and you can’t get a word in edgewise, jot a note on your resume to the effect of, “You were so busy that we didn’t get a chance to meet. I’m very interested in talking to you.” Look around the display for the recruiter’s business card (or at the very least, write down his or her name and get some literature with the company’s address) and send a follow-up note and another copy of your resume.

5. If you know ahead of time that one of your “dream companies” is a career fair participant, do some prior research (at minimum, visit their website). A little advance preparation goes a long way and can make you stand out among the masses of other attendees.

http://engineering.umass.edu/current-students/career-development
What is Professional Networking?
Networking is about making connections. It involves the exchange of information between you and another person in your field of interest.

Who do I “network” with?
In addition to obvious people such as recruiters who come to the career fair, think outside the box in terms of networking. There is a wide range of people who can help connect or advise you about opportunities in your professional field such as:

- On-campus recruiters (these folks come to career fairs, corporate information sessions, technical talks, formal networking events)
- Alumni come back to campus for a variety of events such as reunions, technical presentations, award ceremonies and fundraisers. Many schools, including UMass, have an alumni association that offers an online connection to alumni. Access the directory at http://umassalumni.com/directory or the Alumni Advisor Network at http://umassalumni.evisors.com.
- Faculty/Staff
- People you meet at professional conferences
- Family, friends, neighbors, acquaintances from religious institutions, sporting teams, the gym, etc. (Does your uncle work for an engineering company? How about the family whose pet you cared for or lawn you mowed? Keep in touch, talk about your classes, projects, interest)
- Co-workers (Other students, especially lab or team mates will be key connections in your future. Ask yourself: what kind of teammate am I? Would a current teammate recommend me to their employer in a few years? Why or why not?)
- LinkedIn, other social media that is directly related to your field of interest (AICHE, ASME…)

What kind of results can I expect from networking?
Don’t expect that someone else is going to “get you a job”. You must get yourself the job by presenting your skills, competencies, knowledge and personality well. However, networking CAN help provide:

- Leads on openings at specific companies
- “Inside information” on what a company is looking for when hiring
- The name of a contact within the company such as a hiring manager or HR person
- Career advice on what type of path to choose in order to meet your career goals
- Names of companies who are doing the type of work you are interested in

What do I say when I am “networking”?
Many people feel awkward at networking events, not knowing what to say or how to present themselves without sounding like a salesperson. However, being prepared with some general information will help you feel more confident in talking about your career interests. Possibly the best thing to remember is to “keep it real”. Start as you would any conversation, by introducing yourself, then be prepared to follow up as the conversation progresses. Don’t forget to ask about them as well. Questions like, “What is your job like”, “What does a typical day on the job look like for you” “How long have you been in the field” or “What types of problems do you encounter” make the conversation a two-way street. Make sure you have thought about the following things in advance and practice them out loud.

- Name, major (or degree), and school level (senior, junior, sophomore)
- Your career area of interest. (It is important to find the balance between being very specific yet staying open-minded about career fields. For example, if you are interested in working with high-end sound systems and you are at a networking event with Bose, you should be very specific about your interest. However, if you are talking with a neighbor who works at company that manufactures medical devices, you should broaden the conversation to talk about your interest in gaining experience in a manufacturing environment.)
- A brief summary about the relevant classes you have taken. This will vary depending on the person you are taking with. For example, if the person works for a specialty materials company, you might talk about your polymer class. However, if the person works for an oil refinery, you might talk about your process design or controls class.
- A brief summary about any relevant projects or internships you have had.
- Activities that demonstrate teamwork, technical writing, leadership skills.

Examples: Depending on the nature of the networking event, your level of preparation will vary. If you are going to a formal networking event, career fair, or professional conference, you should definitely spend some time researching who will be in attendance so that you will be able to tailor your conversation to match the needs of the various attendees. For example: Imagine that you are going to the Society of Women in Engineering Conference and you are participating in the Abbott Networking Night. Your “pitch” could sound something like this:

Hi, my name is Jessica and I’m a senior Chemical Engineering student at the University of Massachusetts. I am very interested in the pharmaceutical field and am doing a biochemical engineering concentration that includes specialty classes in bioprocessing. Last year, I went on a plant tour of Bristol Myers Squibb which really got me interested in working on the manufacturing side of bioprocessing.

Or, if you are at a sporting event and find yourself sitting next to the town engineer, you could say:

(continued on page 10)
Cisco Engineering
Changing the world

Shape the future of technology. Join us, and help invent new ways to connect the unconnected. Come up with ideas to make our products better and create new ones. Be a problem-solver at the heart of a company that’s changing the way people live, work, play, and learn.

Whatever role you take on, you’ll work with people who have something to teach you. And who celebrate each other’s achievements.

So bring us your unique talent and experiences. Share your ideas and be heard. Help us change the world.

Are you up to the challenge?

Learn more at cisco.com/careers.
Hi, I’m Dan, I will be graduating next year with my degree in Civil Engineering from UMass Amherst. I am interested in structural engineering and am looking to gain some hands-on experience in the field. I’ve had classes in concrete design, soil mechanics and water/wastewater systems. I’m also the captain of the concrete canoe team. I would love the opportunity to apply some of these principles to a real-world environment.

Other General Tips for Networking

- If you will be attending a formal networking event or career fair, ask the event coordinators for a list of attendees so that you can research the type of work they do.
- Know the dress code for the event. (business casual vs. suit and tie) Bring breath mints!
- Remember to ask for business cards
- Follow up with contacts after the event. A nice email or LinkedIn note goes a long way!

BUILDING AN EFFECTIVE LINKEDIN PROFILE

As more and more recruiters turn to social media sites for their recruiting efforts (studies suggest that approximately 94% of recruiters use these sites), it is clear that graduate students need to spend time creating an effective online profile.

Fully “Complete” Your Profile

- According to LinkedIn, your profile will get significantly more views if you complete the following sections:
  - Industry and location
  - Current Position (include description)
  - Education
  - Skills set
  - Profile Photo
  - Have at least 50 connections

Your Professional Photo

Your LinkedIn profile picture should be a headshot of you in a professional, straight-forward position. Don’t include props, scenery, etc. Keep it simple and professional, but also remember to smile and look friendly and approachable. Ask a friend or colleague to take the picture (no selfies!) or come by the UMass COE Career Center and ask one of our staff to help.

Your Customized Headline

Use industry-specific terms to highlight your key skills and competencies to market yourself to recruiters. LinkedIn gives you 120 characters to set yourself apart from the competition!

Your Summary Statement

The Summary serves as an “Opening Statement” to recruiters about why they should hire you. This section should summarize what background, skills, achievements and interests you bring to the table. Remember that skills and competencies included in the Summary Statement should be “fleshed out” in the following “Experience” section. You should be able to back-up any claims you make about yourself in the Summary Statement with evidence from your experiences.

Your Experience

- This is the largest section of your LinkedIn profile, and it should show clear and concise examples of professional experiences you have had that demonstrate your technical and professional skills. It is not necessary that every “experience” be a paid one—class projects and research are excellent examples of places where you may have gained technical proficiencies, trouble-shooting, teamwork and presentation skills. Many large companies use a Key Word search when reviewing resumes. Make sure your Experience Section includes the Key Words for any specific position you are applying to.

Education

As a student, you will be looking for a position while you are still completing your degree. Make sure that you have included your “Anticipated Graduation Date” so that employers know when you expect to graduate and when you would be available for work.

Recommendations

One important component of networking is to begin to build credibility in a professional capacity. Consider asking faculty or colleagues who can comment on your technical competencies, work ethic, teamwork, writing or presenting skills to provide a recommendation for you.

Joining and Following Groups and Companies

Joining discipline-specific groups helps you to connect with other like-minded professionals in your field. Make sure that you are joining groups that you can both benefit from and contribute to. LinkedIn is a community, not just a one-sided search site. In addition, “Follow” companies that you might be interested in applying to. Knowing about upcoming recruiting events or recent projects will give you an edge in the recruiting process.
DENSO
ONE OF THE LARGEST AUTOMOTIVE SUPPLIERS OF ADVANCED SYSTEMS, TECHNOLOGY AND COMPONENTS.

densocareers.com
EXPERIENTIAL LEARNING: INTERNSHIPS, CO-OPS, ACADEMIC RESEARCH

Relevant engineering experience allows you to apply academic concepts in practice and explore possible career options. In addition, the skills and knowledge acquired through experiential learning make you more marketable to companies. Reports from a variety of sources show that, compared to the average, students who participate in these programs:

- Do better in school
- Are ahead in preparation for their field
- Are viewed as better candidates in job interviews
- Receive more job offers
- Earn higher starting salaries
- Are more likely to get the job with the employer they want after graduation

Other benefits of Internships and Experiential Education Programs include developing transferable skills such as: communication, critical thinking, teamwork, change management, information technology, leadership, self-managed learning, interpersonal diversity, ethics, social responsibility, and technical knowledge.

**Internship**

An internship is a work experience, usually in the summer, related to your major. Most engineering internships are paid and the terms of payment are worked out between the company and the student. The Engineering Career Center and the UMass Career Center regularly post internships on their job boards.

**Co-op**

A co-op is a three to nine month position related to your major. Engineering co-op positions are paid and take place during the school semester. During a co-op you maintain your status as an enrolled UMass Amherst student but do not pay tuition. Once you have accepted a co-op position, you must meet with your academic advisor and the field experience coordinator in Goodell 511 to fill out the necessary paperwork.

**Research Experience**

Many students participate in research projects with UMass Amherst engineering professors throughout the semester. These research projects may either be paid or unpaid. In general, faculty look for students with outstanding grades and a demonstrated interest in their specific engineering field when hiring a student.

The National Science Foundation sponsors the Research Experience for Undergraduates (REU) program each year. This program supports undergraduate research through projects that are funded through NSF grants. These are paid positions. You must be a U.S. citizen or permanent resident to qualify for this program. Last year, approximately 150 academic institutions, national labs and research centers operated a REU program. To search for specific positions, go to: [http://www.nsf.gov/crssprgm/reu/](http://www.nsf.gov/crssprgm/reu/).

“**The Engineering Career Center helped me grow as a student and a professional, and it was their guidance that helped me get the job that fits my skills and personality perfectly. The Career Center staff helped me fine tune my resume and hone my networking and interviewing skills, giving me a clear advantage while searching for jobs. They provided a strong basis from which to work, hosting many companies for information sessions and sending out job opportunities each week. The Engineering Career Center is one of the most invaluable resources available to the UMass Amherst students, and was a game changer for me as I begin my career.”**

— Dan Amichetti, AbbVie

“I met Verizon Wireless at the fall career fair, and after a phone interview I was brought on as a summer intern. There were many teams all working together to grow and optimize the cellular network, and they put me right in the middle of it all. I had the same duties as full time engineers, activating and optimizing new cell towers, and working with the new LTE hardware.”

— Tim Coyle, EE ’13
TURNING YOUR INTERNSHIP INTO A FULL-TIME POSITION

One of the best benefits of an internship or cooperative education experience is that it can serve as your passport to future employment opportunities. Getting your foot in the door by landing the internship or co-op is only half of the challenge in turning your career dreams into a reality. The more vital half is to build a reputation during this career experience that will culminate in receiving a full-time job offer.

A growing number of employers are using internships as a way to gain a first-in-depth look at prospective employees. In this respect, both you and your employer have a common goal—namely, to determine if there is a good fit between you. In receiving a full-time job offer, it can be the first link in the chain of your career. It is up to you to establish a correlation between your learning goals and the daily work you are asked to perform. Maintain a journal of your activities and accomplishments in order to monitor your progress. Seek regular reviews from your supervisor to assess your performance and reinforce the fact that you mean business.

6. Communicate Respectfully
Assume that everyone else knows more than you do. However, don’t be afraid to present useful ideas that may save time or money or solve problems. Make sure, however, that your style does not come across as cocky. Employers value assertiveness but not aggressiveness. Find out the proper way to address individuals, including customers. Maintain a pleasant and respectful demeanor with every person, regardless of his or her rank.

7. Be Flexible
Accept a wide variety of tasks, even those that may not relate directly to your assignments or those that may seem like grunt work. Your willingness to go the extra mile, especially during “crunch time,” will help you carve the way to assuming greater responsibilities.

8. Be a Team Player
Learn how your assignment fits into the grand scheme of things and keep a keen eye on getting the job done. In today’s work environment, success is often defined along the lines of your ability to get along with and interact with others. You’re a winner only if your team wins.

9. Get a Mentor
Identify at least one individual to serve as your mentor or professional guardian. It should be someone who is willing to take a personal interest in your career development and success. Once you know your way around, begin to network wisely and get “plugged in” by associating with seasoned employees who may share their knowledge, perspectives and insights. Get noticed, because many more people will have a role in determining your future than you might at first realize.

10. Have Fun!
Last but not least, enjoy learning, sharpening your skills and developing professionally and personally. Participate in work-related social functions and become an active member in your work community.

Your learning agenda should target specific skills and competencies that you wish to acquire and demonstrate. After all, the learning agenda is what distinguishes a short-term job from an internship. It is up to you to establish a correlation between your learning goals and the daily work you are asked to perform. Maintain a journal of your activities and accomplishments in order to monitor your progress. Seek regular reviews from your supervisor to assess your performance and reinforce the fact that you mean business.

Written by Lina Melkonian, Executive Director of Development at San José State University, College of Engineering.

http://engineering.umass.edu/current-students/career-development 13
CREATING AN EFFECTIVE RESUME

The resume serves as a marketing tool to highlight your relevant experience and skills, as well as your accomplishments. Your resume will not get the job for you, but it will, if effective, result in interviews. Your resume must be concise, easy to read and understand, and use words that are familiar to the reader and have universal appeal. The goals of your resume are to: illustrate achievements, attributes, and expertise to the best possible advantage and minimize any possible weaknesses. Your resume should provide all of the information necessary to allow a prospective employer to identify your transferable skills. When applying to engineering positions you should demonstrate technical acumen, problem-solving skills, a results-oriented mindset, teamwork, and communication skills.

The Top 10 Pitfalls in Resume Writing
1. Too long. Restrict your resume to one page.
2. Typographical, grammatical, or spelling errors. Have at least two people proofread your resume.
3. Hard to read. Keep it simple with clean lines and white space.
4. Too verbose. Say as much as possible with as few words as possible, avoid use of jargon.
5. Not enough information. Give dates describing related work experience, be specific about skills, accomplishments, activities, interests, and memberships.
6. Irrelevant information. Customize each resume to each position you seek (when possible). Of course, include education and work experience, but emphasize relevant experience, skills, accomplishments and activities. Do not include marital status, age, sex, children, height, weight, health, church membership, etc.
7. Obviously generic. Tweak each resume according to the job description. The employer needs to feel that you are interested in that particular position with his or her company.
8. Too fancy. Avoid exotic fonts, colored paper, photographs, binders, and graphics. Electronic resumes should include appropriate industry keywords and use a font size between 10-12 points. Use italics and bold face sparingly.
9. Too static. Make your resume as dynamic as possible. Begin every statement with an action verb. Use active verbs to describe what you have accomplished in past jobs. Take advantage of your rich vocabulary and avoid repeating words, especially the first word in a section.
10. Too modest. The resume showcases your qualifications in competition with the other applicants. Put your best foot forward without misrepresentation, falsification, or arrogance.

The Three Rs of resume writing are Research, Research, Research. You must know what the prospective company does, what the position involves and whether you will be a fit, before submitting your resume. And that means doing research—about the company, about the position and about the type of employee the company typically hires.

Research the company. Read whatever literature the company has placed in the career library. For additional information, call the company. Ask for any literature it may have, find out how the company is structured and ask what qualities the company generally looks for in its employees. Ask if there are openings in your area, and find out the name of the department head and give him or her a call. Explain that you are considering applying to their company, and ask for their recommendation for next steps. Thank that person for the information, and ask to whom your resume should be directed.

The Internet is another key tool to utilize in your research. Most companies have websites that include information regarding company background, community involvement, special events, executive bios or even past annual reports. Be sure to take advantage of the Internet during your job search.

Research the position. The more you know about the position, the better able you will be to sell yourself and to target your resume to that position. If possible, interview someone who does that same job. In addition to finding out the duties, ask if there is on-the-job training, whether they value education over experience (or vice versa) and what kind of turnover the department experiences. Ask what they like about the position and the company; more important, ask what they don’t like about it.

Finally, research yourself. Your goal is not just to get a job. Your goal is to get a job that you will enjoy. After you find out all you can about the company and the position, ask yourself honestly whether this is what you really want to do and where you really want to be. The odds are overwhelming that you will not hold this position for more than two or three years, so it’s not a lifetime commitment; however, this first job will be the base of your lifetime career. You must start successfully so that future recommendations will always be positive. Furthermore, three years is a long time to spend doing something you don’t like, working in a position that isn’t challenging or living somewhere you don’t want to live.

One last word of advice: Before you go to the interview, review the version of your resume that you submitted to this employer. The resume can only get you the interview; the interview gets you the job.

# RESUME OUTLINE

**NAME**

**EMAIL ADDRESS**

**CURRENT ADDRESS**

**PHONE NUMBER**

**PERMANENT ADDRESS**

**PHONE NUMBER**

## SUMMARY STATEMENT

- A summary statement is a one- or two-sentence description of the skills and qualities that you would bring to the job that would make a recruiter interested in hiring you. It is like an introduction which is supported by the details in the body of your resume. It is a good way to put keywords in the head of the reader, so that they are thinking of them as they read through your resume.
- Avoid self-serving statements such as “…a company where I will be able to advance my career.” Show your interest in the company, not what you hope the company will do for you.

## EDUCATION

**Institution, Location**

- Degree, GPA, Date of (anticipated) Graduation
- Traditionally, either education or experience is the first category after Objective/Professional Summary. Which one you choose will depend on where you are in your career and the types of jobs for which you are applying.
- Check with your major department to make sure you have listed degree information correctly.
- It is up to you whether or not to list your GPA. If it is above a 3.0, it is suggested.
- You can include academic honors here or in a separate section.
- List coursework if it is unique for your major and relates to the position for which you are applying, or if you are an underclassman applying for an internship and want to include the engineering courses that you have taken thus far.

## EXPERIENCE

**Company, Location (mm/yy-mm/yy of total time employed by company)**

- Title (mm/yy-mm/yy in that position, if you have held more than one position with same company)
- Begin each point with an action verb of the appropriate tense.
- Begin with an overall summary of the project you did in context of the problem you were trying to solve. Then, walk through the process you took to solve the problem in a logical, systematic way, making sure that you include any instrumentation, computer software, or standardized methods that you used. What were the results you achieved?
- Quantify wherever possible—“Increased the efficiency of the process by 20%.”
- Make sure your descriptions make sense and have enough detail to be meaningful.
- Make sure to include any communication skills that you used in the project or job such as writing a technical report, giving a presentation, or working in a team.

## OTHER

- Use this section to highlight any additional skills, qualification or experiences. Label this section appropriately (Global Profile, Computer Skills, Certifications, Volunteer Experience, etc.).
- Computer Skills should contain programs you are familiar with, especially those mentioned in the job description. If you are applying for technology positions and have extensive computer skills, consider placing this section between the Education and Experience sections.
- Volunteer Activities can be listed here or with your experience.
- If you held a leadership position with an organization, consider including your notable duties/accomplishments.
- If necessary, you can list your work authorization in this section.

## GENERAL RESUME TIPS

- Spell check, proofread, read backwards, have someone check your resume, etc.
- Don’t include “References available on request.” This is assumed by the employer and wastes valuable space.
- In general, resumes should be kept to one page. Individuals with extensive full-time work experience or multiple degrees can extend their resume beyond the one-page limit. The danger of having a long resume is that the recruiter may not make it past your first page.
- Present your qualifications in the best possible light, but do not exaggerate or mislead. Employers will verify the information with your references and educational institutions.
- Resumes should be tailored to the type of position/industry for which you are applying.
- High school information should start to come off your resume when you enter college and be completely gone by graduation.
- Remember the guidelines for scannable resumes, such as avoid italics and underlines, don’t fold a resume that might get scanned, and use keywords where possible.
- Don’t use smaller than 10 pt. font.
Michael Martinez
17 Verona Street, Sharon, MA 02067
mzmartinez@umass.edu 781-555-1234

Summary Statement
Well-rounded, driven engineering student with strong interest in computer hardware and software design.

Education
University of Massachusetts Amherst
Bachelor of Science in Electrical Engineering, GPA: 3.4
Abigail Adams Scholarship
Expected Graduation May 2018

Relevant Courses
Java Programming, Intro to Electrical & Computer Systems Engineering, Physics I & II, Calculus I & II

Academic Projects
Intro to Electrical & Computer Engineering
• Worked in a team to create hardware buzzer system for four person game show that would accept first contestant response only
• Designed circuit using D flip-flops, AND gates, switches, and LEDs
• Wrote project report including description of internal circuitry
• Constructed successful circuit and demonstrated to faculty and peers

M5 Design Lab, Independent Project
• Participated in a team to build a mobile robot with camera assisted navigation
• Worked in the Electrical Group on Arduino, design of circuits and wiring

Experience
Tech Connections, Sharon, MA
Customer Consultant
• Worked with business and consumer clients providing technical support for computer and hardware, software, and mobile devices
• Diagnosed and solved networking, device security, and backup problems
• Supported tech team that earned first place in corporate wide customer satisfaction survey

May – August 2014

Skills
Java, C, MATLAB, Microsoft Office

Volunteer Experience
Sharon Community Food Basket
• Helped serve meals to over 150 low-income individuals and families
• Assisted with food intake and inventory

May – August 2012, 2013

Affiliations & Activities
Institute of Electrical and Electronics Engineers (IEEE)
Society of Hispanic Engineers (SHPE)
Travel, team cycling, swimming
SAMPLE SOPHOMORE RESUME

Sarah James
15 Belle Rd, Troy, NY 12180
sqjames@umass.edu
(413)-555-1234

Summary
Diligent, reliable civil engineering sophomore with strong academic track record and demonstrated leadership and communication skills

Education
University of Massachusetts Amherst Anticipated May 2017
Bachelor of Science in Civil Engineering, GPA: 3.7
Dean’s List

Coursework
Intro to Civil and Environmental Engineering, Civil Engineering Measurements, Statics, Thermodynamics, Strength of Materials, Systems Analysis and Economics in Civil Engineering

Relevant Projects
Concrete Mix and Testing Spring 2015
• Developed concrete mix to withstand force of 5,000 psi based on properties of fine and coarse aggregates including particle-size distribution, moisture content, and specific gravities
• Performed tests on mix properties including air entrainment, and tensile and compressive stress
• Detailed process and results in written lab report

Surveying & Measurements, UMass Spring 2014
• Created topographic map of local public park as part of a four member team
• Measured elevations and surfaces features using total station
• Used AutoCAD to create a topographic map from data collected
• Wrote a technical report including project details and final map

Engineers Without Borders, Kenya Fall 2015
• Traveled with UMass EWB group to help improve water quality in Kenyan village
• Constructed new spring boxes and repaired existing boxes using local tools
• Collected water samples at various sources and analyzed quality with a bacteria agar
• Educated local community on safe water storage, disinfection, and hygiene

Work Experience
ABC Building & Remodeling, Troy, NY Summers 2013, 2014
• Worked with construction crew electrician, plumber and carpenters on residential renovations
• Gained hands-on experience from a wide range of projects including barn construction, support beam replacement, and kitchen remodels

Leadership
Co-captain, University of Massachusetts Intramural Soccer Fall 2013-Present
• Organize team, schedule games, reserve fields and communicate with members

Skills
AutoCAD, MATLAB, Microsoft Word, Excel, PowerPoint, Total Station, construction hand tools

Activities & Interests
Engineers Without Borders, Hiking, Intramural Soccer, Skiing, Guitar
SAMPLE JUNIOR RESUME

Brent Riff
Cell Phone: (413)-555-1234
briff@umass.edu

Permanent Address
49 Pelly Rd.
Sudbury, MA 01776

School Address
16 Montam Rd.
Amherst, MA, 01002

Summary Statement:
Technically strong engineering student with hands-on experience in mechanical design and analysis in independent and team-based projects. Effective communicator motivated by new challenges.

Education:
University of Massachusetts Amherst
Bachelor of Science in Mechanical Engineering, 3.2 GPA
Additionally, pursuing Certificate in Material Science
Anticipated May 2016

Relevant Courses:

Work Experience:
Adler Controls, Sudbury, MA – Mechanical Engineering Intern
May – August 2014
• Conducted force characterization analysis on aircraft circuit breakers to determine cause of low first pass yield rates on production line.
• Designed test plan and implemented, testing circuit breakers at various current levels per device specifications.
• Used high speed and thermal imaging camera and real time x-ray machine to test devices.
• Analyzed data and recommended re-design to improve first pass production yield rates.
• Compiled final report of the findings and delivered results in a PowerPoint presentation to senior managers.

Academic Projects
Carbon Fiber Composite Sandwich Design
Fall 2014
• Group leader for lab project in which the highest specific flexural modulus of a composite was to be attained by use of carbon fiber facing and a foam core with specific dimensional constraints.
• Researched foam core materials, contacted vendors and acquired samples of ridged PVC foam.
• Prepared specimens, conducted three-point bend test and Charpy impact test in accordance with ASTM 790D-07.
• Collected data and complied into formal PowerPoint presentation and technical report to present to course instructor/lab.
• Final result was a composite material that was determined to have had the highest specific flexural modulus.

Rocket Prototype Modeling & Design
Fall 2012
• Group leader for engineering project in which the trajectory of a water rocket at varying initial pressures, water loads, and launch angles was mathematically modeled with MATLAB.
• Coordinated logistics of meeting times/locations, deadlines, and final presentation.
• Constructed prototype rockets and launch pad with ProEngineer.
• Physically built three rocket types and launch pad for field testing based on ProEngineer specs.
• Collected data on the varying launch distances and compared them to the MATLAB model.
• Delivered a PowerPoint presentation and submitted a technical paper to Professor, TAs, and class.

Research:
Independent Study – Wind Turbines Effect on Radar Interference
Spring 2015
• Researched the effects wind turbines have on radar interference to assess and eliminate issues facing the wind industry.
• Learned ways to prevent wind installations from being denied permission to be built due to radar interference.
• Delivered a final research paper on the subject explaining the various forms of radar interference, the causes of the various radar interferences, as well as, mitigation techniques to minimize wind turbines negative effects on radar.
• Received a grade of an “A” for the research done.

Technical Skills:

Interests:
General fitness, community service, outdoor activities; snowboarding, boating, hiking, and fishing.
SAMPLE SENIOR RESUME

Samuel T. Mitchell

smitc@umass.edu

333 Jodi Lane

Townsend MA, 01469

Chemical Engineer experienced in both manufacturing and research and development in an industrial setting. Effective problem-solver with solid technical skills and demonstrated leadership interested in pharmaceutical processing.

Education:
University of Massachusetts, Amherst May 2015
- Bachelor of Science in Chemical Engineering, GPA: 3.5
- Concentration in Biochemical Engineering

Additional Coursework:
Cellular and Molecular Biology, Biochemistry for Chemists, Intro to Biochemical Engineering, Bioprocessing Engineering Lab, Tissue Engineering (Graduate Level)

Engineering Experience:
Bioprocessing Lab, UMass Amherst January 2015 - Present
- Synthesizing, purifying and analyzing a novel protein (hPP1) with potential cancer treatment applications.
- Used PCR to engineer primers for the gene encoding the protein of interest, inserted completed gene into pET-42 inducible expression plasmid and transformed plasmid into bacterial cells via Petri dish cell culture.
- Cultured the engineered cells to produce protein of interest in 5L bioreactor, monitored batch information through growth and production phases and adjusted agitation, temperature, and pH as needed.
- Currently designing a process to purify hPP1 from the fermentation broth using various forms of chromatography.
- Performed assays to determine if cells contained DNA for hPP1 by PCR and gel electrophoresis. Will quantify amount and activity of protein present in the purified fermentation product.

Byers PharmaTech, Boston, MA
Manufacturing Engineering Co-op August 2013 - January 2014
- Coordinated the review and updating of over 500 electronic records of the Clean In Place/Steam In Place (CIP/SIP) systems as Engineering teams identified necessary modifications to the CIP/SIP routes.
- Created and presented a Plant Hazards Training Seminar to over 25 professionals including the site-wide First Aid/Safety Team (FAST) and Environmental Health and Safety Department (EH&S).

Steam In Place Validation Engineer
May 2014 - August 2014
- Executed over 100 Steam in Place Performance Qualification tests on biopharmaceutical manufacturing equipment including Bioreactors, Liquid Filters, Chromatography skids and an Ultra-Filtration device.
- Troubleshotted failed tests, analyzed data and compiled extensive data packages that will be used by the FDA during the final review of the plant.

Leadership & Activities:
President of AIChE UMass Student Chapter April 2014 - April 2015
- Organized Executive Board and General Chapter Body of over 80 students to decide the direction of the society.
- Interacted with leadership of other school’s societies, organized a delegation to the National Student Conference.

Chem-E-Car Team - American Institute of Chemical Engineers (AIChE) Competition 2012
- Worked on team of four to build a hydrogen fuel cell powered model car to travel specified distance at set weight
- Applied pressure-distance curve to predict travel distance based on varying pressures of hydrogen vessel
- Produced chassis components to ensure optimal structural integrity using 3D printer
- Earned 1st place among 40 cars in the AIChE regional competition

Skills: Proficient in MathCAD, MATLAB and AutoCAD, Microsoft Office Suite. Working knowledge in Aspen
The interviewing process can be scary if you don’t know what to expect. All interviews fit a general pattern. While each interview will differ, all will share three common characteristics: the beginning, middle and conclusion. The typical interview will last 30 minutes, although some may be longer. A typical structure is as follows:

1. Five minutes—small talk
2. Fifteen minutes—a mutual discussion of your background and credentials as they relate to the needs of the employer
3. Five minutes—asks you for questions
4. Five minutes—conclusion of interview

As you can see, there is not a lot of time to state your case. The employer may try to do most of the talking. When you do respond to questions or ask your own, your statements should be concise and organized without being too brief.

How’s Your Small Talk Vocabulary?
Many recruiters will begin the interview with some small talk. Topics may range from the weather to sports and will rarely focus on anything that brings out your skills. Nonetheless, you are still being evaluated. Recruiters are trained to evaluate candidates on many different points. They may be judging how well you communicate on an informal basis. This means you must do more than smile and nod.

The Recruiter Has the Floor
The main part of the interview starts when the recruiter begins discussing the organization. If the recruiter uses vague generalities about the position and you want more specific information, ask questions. Be sure you have a clear understanding of the job and the company.

As the interview turns to talk about your qualifications, be prepared to deal with aspects of your background that could be construed as negative, i.e., low grade point average, no participation in outside activities, no related work experience. It is up to you to convince the recruiter that although these points appear negative, positive attributes can be found in them. A low GPA could stem from having to fully support yourself through college; you might have no related work experience, but plenty of experience that shows you to be a loyal and valued employee.

Many times recruiters will ask why you chose the major you did or what your career goals are. These questions are designed to determine your goal direction. Employers seek people who have direction and motivation. This can be demonstrated by your answers to these innocent-sounding questions.

The Recruiter Has the Floor
The main part of the interview starts when the recruiter begins discussing the organization. If the recruiter uses vague generalities about the position and you want more specific information, ask questions. Be sure you have a clear understanding of the job and the company.

As the interview turns to talk about your qualifications, be prepared to deal with aspects of your background that could be construed as negative, i.e., low grade point average, no participation in outside activities, no related work experience. It is up to you to convince the recruiter that although these points appear negative, positive attributes can be found in them. A low GPA could stem from having to fully support yourself through college; you might have no related work experience, but plenty of experience that shows you to be a loyal and valued employee.

Many times recruiters will ask why you chose the major you did or what your career goals are. These questions are designed to determine your goal direction. Employers seek people who have direction and motivation. This can be demonstrated by your answers to these innocent-sounding questions.

It’s Your Turn to Ask Questions
When the recruiter asks, “Now do you have any questions?” it is important to have a few ready. Dr. C. Randall Powell, author of Career Planning Today, suggests some excellent strategies for dealing with this issue. He says questions should elicit positive responses from the employer. Also, the questions should bring out your interest in and knowledge of the organization.

By asking intelligent, well-thought-out questions, you show the employer you are serious about the organization and need more information. It also indicates to the recruiter that you have done your homework.

The Close Counts, Too
The interview isn’t over until you walk out the door. The conclusion of the interview usually lasts five minutes and is very important. During this time the recruiter is assessing your overall performance.

It is important to remain enthusiastic and courteous. Often the conclusion of the interview is indicated when the recruiter stands up. However, if you feel the interview has reached its conclusion, feel free to stand up first. Shake the recruiter’s hand and thank him or her for considering you. Being forthright is a quality that most employers will respect, indicating that you feel you have presented your case and the decision is now up to the employer.

Expect the Unexpected
During the interview, you may be asked some unusual questions. Don’t be too surprised. Many times questions are asked simply to see how you react.

For example, surprise questions could range from, “Tell me a joke” to “What time period would you like to have lived in?” These are not the kind of questions for which you can prepare in advance. Your reaction time and the response you give will be evaluated by the employer, but there’s no way to anticipate questions like these. While these questions are not always used, they are intended to force you to react under some stress and pressure. The best advice is to think and give a natural response.

Evaluations Made by Recruiters
The employer will be observing and evaluating you during the interview. Erwin S. Stanton, author of Successful Personnel Recruiting and Selection, indicates some evaluations made by the employer during the interview include:

1. How mentally alert and responsive is the job candidate?
2. Is the applicant able to draw proper inferences and conclusions during the course of the interview?
3. Does the applicant demonstrate a degree of intellectual depth when communicating, or is his/her thinking shallow and lacking depth?
4. Has the candidate used good judgment and common sense regarding life planning up to this point?
5. What is the applicant’s capacity for problem-solving activities?
6. How well does the candidate respond to stress and pressure?
TEN RULES OF INTERVIEWING

Before stepping into an interview, be sure to practice, practice, practice. A job-seeker going to a job interview without preparing is like an actor performing on opening night without rehearsing.

To help with the interview process, keep the following ten rules in mind:

1. Keep your answers brief and concise. Unless asked to give more detail, limit your answers to two to three minutes per question. Tape yourself and see how long it takes you to fully answer a question.

2. Include concrete, quantifiable data. Interviewees tend to talk in generalities. Unfortunately, generalities often fail to convince interviewers that the applicant has assets. Include measurable information and provide details about specific accomplishments when discussing your strengths.

3. Repeat your key strengths three times. It’s essential that you comfortably and confidently articulate your strengths. Explain how the strengths relate to the company’s or department’s goals and how they might benefit the potential employer. If you repeat your strengths then they will be remembered and—if supported with quantifiable accomplishments—they will more likely be believed.

4. Prepare five or more success stories. In preparing for interviews, make a list of your skills and key assets. Then reflect on past jobs and pick out one or two instances when you used those skills successfully.

5. Put yourself on their team. Ally yourself with the prospective employer by using the employer’s name and products or services. For example, “As a member of ________, I would carefully analyze the ________ and ________.” Show that you are thinking like a member of the team and will fit in with the existing environment. Be careful though not to say anything that would offend or be taken negatively. Your research will help you in this area.

6. Image is often as important as content. What you look like and how you say something are just as important as what you say. Studies have shown that 65 percent of the conveyed message is nonverbal; gestures, physical appearance and attire are highly influential during job interviews.

7. Ask questions. The types of questions you ask and the way you ask them can make a tremendous impression on the interviewer. Good questions require advance preparation. Just as you plan how you would answer an interviewer’s questions, write out specific questions you want to ask. Then look for opportunities to ask them during the interview. Don’t ask about benefits or salary. The interview process is a two-way street whereby you and the interviewer assess each other to determine if there is an appropriate match.

8. Maintain a conversational flow. By consciously maintaining a conversational flow—a dialogue instead of a monologue—you will be perceived more positively. Use feedback questions at the end of your answers and use body language and voice intonation to create a conversational interchange between you and the interviewer.

9. Research the company, product lines and competitors. Research will provide information to help you decide whether you’re interested in the company and important data to refer to during the interview.

10. Keep an interview journal. As soon as possible, write a brief summary of what happened. Note any follow-up action you should take and put it in your calendar. Review your presentation. Keep a journal of your attitude and the way you answered the questions. Did you ask questions to get the information you needed? What might you do differently next time? Prepare and send a brief thank-you letter. Restate your skills and stress what you can do for the company.

In Summary
Because of its importance, interviewing requires advance preparation. Only you will be able to positively affect the outcome. You must be able to compete successfully with the competition for the job you want. In order to do that, be certain you have considered the kind of job you want, why you want it and how you qualify for it. You also must face reality: Is the job attainable?

In addition, recognize what it is employers want in their candidates. They want “can do” and “will do” employees. Recognize and use the following factors to your benefit as you develop your sales presentation. In evaluating candidates, employers consider the following factors:

- Ability
- Character
- Loyalty
- Initiative
- Personality
- Communication skills
- Acceptance
- Work record
- Recommendations
- Outside activities while in school
- Impressions made during the interview

Written by Roseanne R. Bensley, Career Services, New Mexico State University.

http://engineering.umass.edu/current-students/career-development 23
Tell me about a time when you were on a team, and one of the members wasn’t carrying his or her weight.” If this is one of the leading questions in your job interview, you could be in for a behavioral interview. Based on the premise that the best way to predict future behavior is to determine past behavior, this style of interviewing is popular among recruiters.

Today, more than ever, each hiring decision is critical. Behavioral interviewing is designed to minimize personal impressions that might cloud the hiring decision. By focusing on the applicant’s actions and behaviors, rather than subjective impressions that can sometimes be misleading, interviewers can make more accurate hiring decisions.

A manager of staff planning and college relations for a major chemical company believes, “Although we have not conducted any formal studies to determine whether retention or success on the job has been affected, I feel our move to behavioral interviewing has been successful. It helps concentrate recruiters’ questions on areas important to our candidates’ success within [our company].” The company introduced behavioral interviewing in the mid-1980s at several sites and has since implemented it companywide.

**Behavioral vs. Traditional Interviews**

If you have training or experience with traditional interviewing techniques, you may find the behavioral interview quite different in several ways:

- ✓ Instead of asking how you would behave in a particular situation, the interviewer will ask you to describe how you did behave.
- ✓ Expect the interviewer to question and probe (think of “peeling the layers from an onion”).
- ✓ The interviewer will ask you to provide details and will not allow you to theorize or generalize about events.
- ✓ The interview will be a more structured process that will concentrate on areas that are important to the interviewer, rather than allowing you to concentrate on areas that you may feel are important.
- ✓ You may not get a chance to deliver any prepared stories.
- ✓ Most interviewers will be taking notes throughout the interview.

The behavioral interviewer has been trained to objectively collect and evaluate information and works from a profile of desired behaviors that are needed for success on the job. Because the behaviors a candidate has demonstrated in previous positions are likely to be repeated, you will be asked to share situations in which you may or may not have exhibited these behaviors. Your answers will be tested for accuracy and consistency.

If you are an entry-level candidate with no previous related experience, the interviewer will look for behaviors in situations similar to those of the target position:

- “Describe a major problem you have faced and how you dealt with it.”
- “Give an example of when you had to work with your hands to accomplish a task or project.”
- “What class did you like the most? What did you like about it?”

Follow-up questions will test for consistency and determine if you exhibited the desired behavior in that situation:

- “Can you give me an example?”
- “What did you do?”
- “What did you say?”
- “What were you thinking?”
- “How did you feel?”
- “What was your role?”
- “What was the result?”

You will notice an absence of such questions as, “Tell me about your strengths and weaknesses.”

**How to Prepare for a Behavioral Interview**

- ✓ Recall recent situations that show favorable behaviors or actions, especially those involving coursework, work experience, leadership, teamwork, initiative, planning, and customer service.
- ✓ Prepare short descriptions of each situation; be ready to give details if asked.
- ✓ Be sure each story has a beginning, a middle and an end; i.e., be ready to describe the situation, your action and the outcome or result.
- ✓ Be sure the outcome or result reflects positively on you (even if the result itself was not favorable).
- ✓ Be honest. Don’t embellish or omit any part of the story. The interviewer will find out if your story is built on a weak foundation.
- ✓ Be specific. Don’t generalize about several events; give a detailed accounting of one event.

A possible response to the question, “Tell me about a time when you were on a team and a member wasn’t pulling his or her weight” might go as follows: “I had been assigned to a team to build a canoe out of concrete. One of our team members wasn’t showing up for our lab sessions or doing his assignments. I finally met with him in private, explained the frustration of the rest of the team and asked if there was anything I could do to help. He told me he was preoccupied with another class that he wasn’t passing, so I found someone to help him with the other course. He not only was able to spend more time on our project, but he was also grateful to me for helping him out. We finished our project on time and got a ‘B’ on it.”

The interviewer might then probe: “How did you feel when you confronted this person?” “Exactly what was the nature of the project?” “What was his responsibility as a team member?” “What was your role?” “At what point did you take it upon yourself to confront him?” You can see it is important that you not make up or “shade” information and why you should have a clear memory of the entire incident.

**Don’t Forget the Basics**

Instead of feeling anxious or threatened by the prospect of a behavioral interview, remember the essential difference between the traditional interview and the behavioral interview: The traditional interviewer may allow you to project what you might or should do in a given situation, whereas the behavioral interviewer is looking for past actions only. It will always be important to put your best foot forward and make a good impression on the interviewer with appropriate attire, good grooming, a firm handshake and direct eye contact. There is no substitute for promptness, courtesy, preparation, enthusiasm and a positive attitude.

**INTERVIEWING—continued**

ARE YOU READY FOR A BEHAVIORAL INTERVIEW?

UMass Amherst College of Engineering Career Center
THE SITE VISIT/INTERVIEW: ONE STEP CLOSER

While on-campus screening interviews are important, on-site visits are where jobs are won or lost. After an on-campus interview, strong candidates are usually invited to visit the employer’s facility. Work with the employer to schedule the on-site visit at a mutually convenient time. Sometimes employers will try to arrange site visits for several candidates to take place at the same time, so there may not be much flexibility... but you’ll never know if the employer is flexible unless you ask.

1. An invitation to an on-site interview is NOT a guarantee of a job offer. It is a chance to examine whether or not you will be a good match for the job and for the organization.

2. If invited to an on-site interview, respond promptly if you are sincerely interested in this employer. Decline politely if you are not. Never go on an on-site interview for the sake of the trip. Document the name and phone number of the person coordinating your trip. Verify who will be handling trip expenses. Most medium- and large-size companies (as well as many smaller ones) will pay your expenses, but others will not. This is very important, because expenses are handled in various ways: 1) the employer may handle all expenses and travel arrangements; 2) you handle your expenses and arrangements (the employer may assist with this), and the employer will reimburse you later; 3) the employer may offer an on-site interview, but will not pay for your travel.

3. Know yourself and the type of job you are seeking with this employer. Don’t say, “I am willing to consider anything you have.”

4. Thoroughly research the potential employer. Read annual reports, newspaper articles, trade journals, etc. Many companies have websites where you can read their mission statements, find out about long-term goals, read recent press releases, and view corporate photos. Don’t limit your research only to company-controlled information. The Internet can be a valuable investigative tool. You may uncover key information that may influence—positively or negatively—your decision to pursue employment with a given organization.

5. Bring extra copies of your resume; copies of any paperwork you may have forwarded to the employer; names, addresses, phone numbers and email addresses of your references; an updated college transcript; a copy of your best paper as a writing sample; a notebook; a black and/or blue pen for filling out forms and applications; and names and addresses of past employers.

6. Bring extra money and a change of clothes. Also, have the names and phone numbers of those who may be meeting you in case your plans change unexpectedly. Anything can happen and you need to be ready for emergencies.

7. Your role at the interview is to respond to questions, to ask your own questions and to observe. Be ready to meet people who are not part of your formal agenda. Be courteous to everyone regardless of his or her position; you never know who might be watching you and your actions once you arrive in town.

8. Don’t forget your table manners. Plant trips may include several meals or attendance at a reception the night before your “big day.” When ordering food at a restaurant, follow the lead of the employer host. For example, don’t order the three-pound lobster if everyone else is having a more moderately priced entree. If you have the “dining jitters,” some authorities suggest ordering food that is easy to handle, such as a boneless fish fillet or chicken breast.

9. Many employers have a set salary range for entry-level positions and others are more negotiable. Though salary should not be brought up until an offer is extended, it is wise to know your worth in advance. In as much as you are a potential employee, you also represent a valuable skills-set product. You should know what kind of product you have created, its value and what the company is willing to buy. Contact your campus career center to obtain more information on salaries.

10. Soon after the site visit, record your impressions of your performance. Review the business cards of those you met or write the information in your notebook before leaving the facility. You should have the names, titles, addresses and phone numbers of everyone who was involved in your interview so you can determine which individuals you may want to contact with additional questions or follow-up information. A thank-you letter should be written to the person(s) who will be making the hiring decision. Stay in touch with the employer if you want to pursue a career with them.

A site visit is a two-way street. You are there to evaluate the employer and to determine if your expectations are met for job content, company culture and values, organizational structure, and lifestyles (both at work and leisure). Take note of how the employees interact, and also assess the physical work environment.

Just as any good salesperson would never leave a customer without attempting to close the sale, you should never leave an interview without some sort of closure. If you decide that the job is right for you, don’t be afraid to tell the employer that you feel that there is a good fit and you are eager to join their team. The employer is interested in hiring people who want to be associated with them and they will never know of your interest if you don’t voice your opinion. Keep in mind that although the employer has the final power to offer a job, your demeanor during the entire interviewing process—both on and off campus—also gives you a great deal of power.

INTERVIEW QUESTIONS

1. Tell me about the most challenging engineering project that you have been involved with during past year.
2. Describe the most significant written technical report or presentation that you had to complete.
3. In your last engineering position, what were some of the things that you spent the most time on, and how much time did you spend on each?
4. What do you enjoy most/least about engineering?
5. What new engineering specialty have you developed during the past year?
6. Do you have any patents? If so, tell me about them. If not, is it something you see yourself pursuing and why or why not?
7. Think of a specific engineering project when you answer this question. What could you have done to be more successful in achieving your goal(s)?
8. Describe a time when you confronted a problem that really tested your engineering know-how.
9. What is your overall career objective? Do you see yourself working in engineering ten years from now? If not, what do you think you will be doing?
10. Give me an example of a time in which you were effective in doing away with the “constant emergencies” and “surprises” that engineers often face.
11. Describe a time when as a member of the engineering department, you were instrumental in building a good long-term relationship with another department within the company.
12. Tell me about your greatest success in using the principles of logic to solve an engineering problem in your last job.
13. Give me an example of a time when that happened. How did you handle it?
14. To what extent has your engineering background required you to be skilled in the analysis of technical reports or information?
15. Describe a time when you used your engineering knowledge to solve a problem for which there appeared to be no answer.
16. Tell me about a time when you became aware of a hazardous workplace condition. How did you handle it?
17. Tell me about your experience in dealing with routine engineering work. How do you keep from getting bored?
18. I expect the engineer that I hire for this position to be responsible for that required a lot of interaction with a variety of people over a long period of time.
19. Give me an example of something that you have learned from a mistake that you made on a job at a client site.
20. How long have you been looking for an engineering spot? Have you had any job offers yet? If so, why are you still looking?
21. Describe a typical day out in the field in your last or present job.
22. What single technical skill or ability is your best asset?
23. What personal characteristics do you feel are necessary to be a successful engineer?
24. Give me an example of something that you have learned from a mistake that you made on a job at a client site.
25. Tell me about a time when you had to make a difficult decision that affected the entire engineering department.
26. Tell me about your greatest success in using the principles of logic to solve an engineering problem in your last job.
27. Give me two examples of technical decisions that you had to make on your last job.
28. Tell me about a time when you had to make a difficult decision that affected the entire engineering department.
29. In the field of engineering, priorities often change quickly. Give me an example of a time when that happened. How did you handle it?
30. Tell me about your greatest success in using the principles of logic to solve an engineering problem in your last job.
31. How do you feel about the workload in the engineering department on your present or previous job?
QUESTIONS TO ASK EMPLOYERS

1. Please describe the duties of the job for me.
2. What kinds of assignments might I expect the first six months on the job?
3. What skills are especially important for someone in this position?
4. Does your company encourage further education?
5. How often are performance reviews given?
6. What products (or services) are in the development stage now?
7. Do you have plans for expansion?
8. What are your growth projections for next year?
9. Have you cut your staff in the last three years?
10. How do you feel about creativity and individuality?
11. Do you offer flextime?
12. Is your company environmentally conscious? In what ways?
13. In what ways is a career with your company better than one with your competitors?
14. Is this a new position or am I replacing someone?
15. What is the largest single problem facing your staff (department) now?
16. May I talk with the last person who held this position?
17. What is the usual promotional time frame?
18. Does your company offer either single or dual career-track programs?
19. What do you like best about your job/company?
20. Once the probation period is completed, how much authority will I have over decisions?
21. Has there been much turnover in this job area?
22. Do you fill positions from the outside or promote from within first?
23. What qualities are you looking for in the candidate who fills this position?
24. Are salary adjustments geared to the cost of living or job performance?
25. What characteristics do the achievers in this company seem to share?
26. Is there a lot of team/project work?
27. Will I have the opportunity to work on special projects?
28. Where does this position fit into the organizational structure?
29. How much travel, if any, is involved in this position?
30. What is the next course of action? When should I expect to hear from you or should I contact you?

ADVICE FROM THE EXPERTS

INTERVIEWING TIPS FROM ON-CAMPUS RECRUITERS

Research organizations in advance of interviews—Since most on-campus interviews are relatively short, it is important that you use this time to sell yourself to an employer. Don’t waste this opportunity by spending too much time on issues that could have been answered by surfing the company’s website. Displaying your knowledge about a potential employer will greatly enhance your chances of interview success.

Define your career goals and the opportunities you want—One of the keys to making a successful sale is product knowledge. In the case of job interviews, that product is you. You need to perform a thorough self-evaluation well in advance of your interviews. Know what your strengths, weaknesses, skills and abilities are and be prepared to discuss them during the interview.

Be enthusiastic and sincere during your interviews—It is important for you to convey a genuine sense of interest during the interview. You must appear eager and flexible, but not too rehearsed. Don’t fixate on being nervous. Even seasoned pros can have the “interview jitters.” Above all, never be late for an interview appointment.

Be honest—Don’t claim interest in an employer if you really do not intend to work for that organization. Don’t lie on your resume or during the interview. While you should never draw attention to your weaknesses, don’t attempt to hide a shortcoming by being untruthful. Learn how to deal with perceived (or real) weaknesses before your interviews by talking to a campus career services professional and/or reading books on job interviewing techniques.

Be realistic—Carefully evaluate what an employer has to offer you...and what you have to offer the employer. Don’t accept a position that isn’t suited to you “just because you need a job.” Although most entry-level salaries have been on the rise, do not set your starting salary expectations too high. If a starting salary seems inordinately low, but is for a position that you really want, you might be able to arrange for an early salary review.

Some of this material is adapted from Recruiting Trends by L. Patrick Scheetz, Ph.D., Collegiate Employment Research Institute. © Michigan State University.
DRESSING FOR THE INTERVIEW

Depending upon your fashion style, whether it is the latest trends for the club scene or merely college senior casual, a job interview may be cause for some drastic wardrobe augmentation.

For your interviews, some of your individualism might have to be curbed. In most business and technical job interviews, when it comes to your appearance, conservativism and conformity are in order.

While many companies have adopted the “office casual” dress code, don’t try to set new standards in the interview. When in doubt, it is better to be too conservative than to be too flashy. For men and women, a suit is the best bet.

Here are some guidelines:

MEN
- A two-piece suit will suffice in most instances.
- Solid colors and tighter-woven fabrics are safer than bold prints or patterns.
- Bright ties bring focus to the face, but a simple pattern is best for an interview.
- Wear polished shoes with socks high enough so no skin is visible when you sit down and cross your legs.

WOMEN
- A suit with a knee-length skirt or dress pants and a tailored blouse is most appropriate.
- Although even the most conservative organizations allow more feminine looks these days, accessories should be kept simple. Basic pumps and modest jewelry and makeup help to present a professional look.
- Keep hemlines and necklines conservative.

A Final Check
And, of course, your appearance is only as good as your grooming. Create a final checklist to review before you go on an interview:
- Neatly trimmed hair
- Conservative makeup
- Shoes polished
- No excessive jewelry; men should refrain from wearing earrings
- No missing buttons, crooked ties or lint
You want your experience and qualifications to shine. Your appearance should enhance your presentation, not overwhelm it.

DEALING WITH REJECTION IN THE JOB SEARCH

After meticulously preparing your cover letters and resumes, you send them to carefully selected companies that you are sure would like to hire you. You even get a few job interviews. But all of your return correspondence is the same: “Thanks, but no thanks.” Your self-confidence melts and you begin to question your value to an employer.

Sometimes, we begin to dread the BIG NO so much that we stop pursuing additional interviews, thereby shutting off our pipeline to the future. We confirm that we couldn’t get a job because we stop looking. Remember, fear of rejection doesn’t have to paralyze your job search efforts. Let that fear fuel your determination; make it your ally and you’ll learn a lot.

Eight Guidelines to Ward Off Rejection

1. Depersonalize the interview.
   Employers may get as many as 500 resumes for one job opening. How can you, I and the other 498 of us be no good?

2. Don’t make it all or nothing.
   Don’t set yourself up for a letdown: “If I don’t get this job, I’m a failure.” Tell yourself, “It could be mine. It’s a good possibility. It’s certainly not an impossibility.”

3. Don’t blame the interviewer.
   Realize interviewers aren’t in a hurry to think and behave our way. Blame your turndown on a stone-hearted interviewer who didn’t flatter you with beautiful compliments, and you will learn nothing.

4. Don’t live in the past.
   When you dredge up past failures, your nervous system kicks in and you experience all the feelings that go with failure. Unwittingly, you overestimate the dangers facing you and underestimate yourself.

5. Don’t get mad at the system.
   Does anything less pleasurable exist than hunting for a job? Still, you must adjust to the world rather than make the world adjust to you. The easiest thing is to conform, to do what 400,000 other people are doing. When you sit down to play bridge or poker or drive a car, do you complain about the rules?

6. Take the spotlight off yourself.
   Sell your skills, not yourself. Concentrate on what you’re there for: to find out the interviewer’s problems and to show how you can work together to solve them.

7. See yourself in the new role.
   Form a mental picture of the positive self you’d like to become in job interviews, rather than focusing on what scares you. All therapists agree on this: Before a person can effect changes, he must really “see” himself in the new role. Just for fun, play with the idea.

8. Keep up your sense of humor.
   Nobody yet has contracted an incurable disease from a job interview.

Written by Roseanne R. Bensley, Career Services, New Mexico State University.
**BUSINESS ETIQUETTE BLUNDERS**

**AND HOW TO FIX THEM**

Getting a handle on business etiquette is even more important in this digital age, when the HR process is in flux and the “rules” aren’t always clear. Here are some of the top etiquette complaints from recruiters, and ways you can avoid those mistakes so that even old-school interviewers will be impressed with your good manners and social graces.

**No Show = No Job**
This should go without saying, but actually showing up to an interview is necessary to lock down a job offer. Yet, too many candidates casually blow off interviews. One of the easiest ways to make a good impression is to arrive for interviews 10-15 minutes early, so you have plenty of time to get settled and perhaps check your appearance one last time.

If something pressing does come up, immediately call to cancel or reschedule. Decided you don’t want the job after all? Don’t just disappear. It’s not only rude, but every industry has a grapevine, and word of flakiness gets around. Failing to show for an on-campus interview can have even more severe consequences, so make sure you know the cancelation and no-show policy.

**Too Negative**
“Keep your emotional baggage outside the interview door,” says Peggy Klaus, author of BRAG! The Art of Tooting Your Own Horn Without Blowing It. We all have days when the alarm doesn’t go off, the weather is a mess, and there’s no parking spot. Don’t whine. Be enthusiastic, eager, flexible, and most of all—likeable. “Do not expect the interviewer to entertain you, or do your job for you by drawing out,” she adds.

**Thankless**
Sending a thank-you note is an important way to demonstrate good manners. It doesn’t have to be handwritten, but it should be considered and specific. “An email is fine, but make sure it shows thought and effort,” says Klaus. “Don’t do it in the elevator on the way down. Do it with forethought, so you can translate what you thought and effort,” says Klaus. “Don’t do it in the elevator on the way down. Do it with forethought, so you can translate what you got out of the interview.”

If you do a round of interviews with three people, say, then send three slightly different thank-you notes that day, or the next. (Get business cards so you have everyone’s contact information close at hand.)

**Too Familiar**
When emailing someone you don’t know well, be a bit formal: Capitalize words, don’t use texting shorthand, and start with a salutation. “You don’t send an email to a Portland, Ore., and can be reached at www.jebra.com.

**What Dress Code?**
Dressing appropriately for an interview is a balancing act. One level in formality above what people normally wear on the job is just right. For men, if you’d wear khakis and a polo shirt on the job, wear dress slacks and a blazer to the interview. Women should follow a similar “step up” plan. (Scope out company dress codes during informational interviews.)

**Dining Disaster**
“On an interview, you’re dressing to get hired, not dated,” says Yate. “Your dress must be conservative and clean cut. It shows respect for the occasion, job, company, interviewer, and most of all—for yourself.”

**Clueless About the Employer**
It’s so easy to do online research, than there’s no reason for you not to know about a prospective employer—the company and the individual. How much will employers care if you don’t do your due diligence? One applicant at IBM was asked if he knew what those three letters stood for. He did not. Next! (In case you ever interview at IBM, the answer is International Business Machines.)

**Annoying Devices**
“We get complaints about candidates taking a cell phone call, or checking email, or texting in a meeting,” says Kathleen Downs, recruiting manager at Robert Half International in Orlando, Fla. “It’s a mistake to not silence a phone during a meeting. Even in the waiting room, we’ve had phones go off and it’s an inappropriate ring tone, like a hip-hop song with swear words.”

Make sure you have a greeting on your voicemail—some employers won’t leave a message if they aren’t sure they’ve reached the right party. And if your phone number is blocked, they can’t call back if you don’t leave a message. “I’ve called candidates and gotten obnoxious voicemail messages, ‘You know who this is. You know what to do,’” she says. That’s not the way to win over a recruiter.

**Poor Profile**
Employers often complain of inappropriate photos or comments on an applicant’s social media profile. “You can try to make that info private, but somehow, someway, there’s a way to get to it,” Downs says. She has her Facebook profile set to private, and directs business contacts to her LinkedIn profile. “Don’t ever post anything racy. For example, don’t post a picture of yourself in a bikini—even if you look good!”

**Tattoos and Piercings**
Tribal tattoos, hair dyed colors not seen in nature, or dreadlocks may turn off conservative employers. If your personal style doesn’t go over well in interviews, cover up (easy with some tattoos) or get a makeover ASAP.

“On a guy with a piercing came to an interview with a tongue ring in,” says Downs. “I told him to go to the restroom and take it out. It was stuck. He had to go to the tattoo parlor a few miles away and have it cut out.”

If your personal style is more important to you than a position with a company, spend a little more time researching the corporate culture of a company before you apply, so you can find the right fit.

PROFESSIONAL CORRESPONDENCE

JOB SEARCH LETTERS

Uses and Formats

Job search letters—or cover letters, as they are known generically—are a vital part of your search for a professional position. The different types of letters are an opportunity for you to prove your communication and organizational skills to prospective employers.

Follow several basic principles when composing the letters:
• Know your audience and purpose
• Use an active voice, not passive
• Be professional—proofread, check for spelling, grammar, and a professional tone

Uses/types of job search letters:
• Application Letter: when applying to a specific job within a specific company
• Prospecting Letter: when applying to a company without a specific job posted
• Networking Letter: when seeking information from a professional in your field
• Thank-You Letter: when thanking an employer for assisting you in some way; i.e., conducting an interview with you or taking time to speak with you at a career fair
• Acceptance Letter: when formally accepting a job offer
• Withdrawal Letter: when withdrawing your application from consideration
• Rejection Letter: when declining a job offer

Formats include:
• Full Block Format: left justified
• Modified Block Format: left justified, except for return address/date and closing/signature, which are located one tab to right of center
• Letterhead: used with either of the above formats, the heading is formatted to match your resume’s heading

While descriptions and samples follow, remember these tips:
• The immediate purpose of your Application and Prospecting Letters is to draw attention to your resume. The ultimate goal of your letter and resume is to get you an interview.
• Letters should be unique and tailored to each job/company, but you should have a basic letter that can be easily adapted to numerous companies quickly and easily.
• Address each employer by their title and professional name, unless you’ve received permission to call them by their first name.
• Indicate your knowledge and interest in the company by doing your homework on the company’s recent projects and having an understanding of the job description.

Cover Letter Format

Your Street Address
City, State Zip Code
Telephone Number
Email Address

Date
Contact Name, Title
Name of Organization
Street or P. O. Box Address
City, State Zip Code

Dear Mr./Ms. Last Name:

Opening Paragraph:
The first paragraph should be brief, perhaps two or three sentences. Use this paragraph to introduce the position you are applying for, how you learned about this position, and to identify any personal contacts you have with the company. Do some research so you can state your interest in this particular company/position.

Second Paragraph:
The middle paragraph(s) is used to expand upon your qualifications and how they match with the needs of the company. Identify your most relevant skills and qualifications, demonstrating how your background and experiences qualify you for the job. Be sure to focus on the reader’s needs, not your own.

Third Paragraph:
The concluding paragraph should summarize why your background, experience, and personality would be a good fit for the position. State how you can be reached and express your willingness to come in for an interview or supply further information and thank them for their time and consideration.

Sincerely,

Your Signature

Your Name Typed

EMAIL CORRESPONDENCE

For most of us, sending and receiving email is simple and fun. We use it to communicate with friends and family and to converse with our contemporaries in an informal manner. But while we may be unguarded in our tone when we email friends, a professional tone should be maintained when communicating with prospective employers.

Email is a powerful tool in the hands of a knowledgeable job-seeker. Use it wisely and you will shine. Use it improperly, however, and you’ll brand yourself as immature and unprofessional. It’s irritating when a professional email doesn’t stay on topic, or the writer just rambles. Try to succinctly get your point across—then end the email.

Be aware that email is often the preferred method of communication between job-seeker and employer. There are general guidelines that should be followed when emailing cover letters, thank-you notes and replies to various requests for information. Apply the following advice to every email you write:

• Use a meaningful subject header for your email—one that is appropriate to the topic.

• Always be professional and businesslike in your correspondence. Address the recipient as Mr., Ms. or Mrs., and always verify the correct spelling of the recipient’s name.

• Be brief in your communications. Don’t overload the employer with lots of questions in your email.

• Ditch the emoticons. While a ☺ or an LOL (laughing out loud) may go over well with friends and family, do not use such symbols in your email communications with business people.

• Do not use strange fonts, wallpapers or multicolored backgrounds.

• Sign your email with your full name.

• Avoid using slang.

• Be sure to proofread and spell-check your email before sending it.

Neal Murray, former director of the career services center at the University of California, San Diego, sees a lot of email from job-seekers. “You’d be amazed at the number of emails I receive that have spelling errors, grammatical errors, formatting errors—emails that are too informal in tone or just poorly written,” says Murray. Such emails can send the message that you are unprofessional or unqualified.

When you’re dealing with employers, there is no such thing as an inconsequential communication. Your emails say far more about you than you might realize, and it is important to always present a polished, professional image—even if you are just emailing your phone number and a time when you can be contacted. If you are sloppy and careless, a seemingly trivial communication will stick out like a sore thumb.

Thank-You Notes

If you’ve had an interview with a prospective employer, a thank-you note is a good way to express your appreciation. The note can be emailed a day or two after your interview and only needs to be a few sentences long, as in the following:

Dear Ms. Jones:

I just wanted to send a quick note to thank you for yesterday’s interview. The position we discussed is exactly what I’ve been looking for, and I feel that I will be able to make a positive contribution to your organization. I appreciate the opportunity to be considered for employment at XYZ Corporation. Please don’t hesitate to contact me if you need further information.

Sincerely,

John Doe

Remember, a thank-you note is just that—a simple way to say thank you. In the business world, even these brief notes need to be handled with care.

Tips

In addition to the guidelines stated above, here are a few tips to keep in mind:

• Make sure you spell the recipient’s name correctly. If the person uses initials such as J.A. Smith and you are not certain of the individual’s gender, then begin the email: “Dear J.A. Smith.”

• Stick to a standard font like Times New Roman, 12-point.

• Keep your email brief and businesslike.

• Proofread everything you write before sending it.

While a well-crafted email may not be solely responsible for getting you your dream job, rest assured that an email full of errors will result in your being overlooked. Use these email guidelines and you will give yourself an advantage over other job-seekers who are unaware of how to professionally converse through email.

QUALITIES DESIRED IN NEW COLLEGE GRADUATES
By Businesses, Industries and Government Agencies

Energy, Drive, Enthusiasm and Initiative
Hard-working, disciplined and dependable
Eager, professional and positive attitude
Strong self-motivation and high self-esteem
Confident and assertive, yet diplomatic and flexible
Sincere and preserves integrity
Ambitious and takes risks
Uses common sense

Adapts Textbook Learning to the Working World
Quick learner
Asks questions
Analytical; independent thinker
Willing to continue education and growth
Committed to excellence

Open-minded, willing to try new things

Knowledge of Computers
Established word processing, spreadsheet, database and presentation software skills
Excellent computer literacy

Communications Skills
Good writing skills
Excellent oral communication skills
Listens well; compassionate and empathetic
Excellent problem-solving and analytical skills
Creative and innovative

Leadership Skills
Organizational skills and attention to detail
Accepts and handles responsibilities

Action-oriented and results-driven
Loyal to employers
Customer-focused
Team-spirited; understands group dynamics
Always willing to help others
Mature, poised and personable
Diversity aware; treats others with respect and dignity

 Oriented to Growth
Acceptance of an entry-level position; doesn’t view required tasks as “menial”
Academic excellence in field of study
Views the organization’s total picture, not just one area of specialization
Willing to accomplish more than required

JOB SEARCH RESOURCES

| UMASS CAREERCONNECT | UMass Career Services searchable online job board
Go to http://www.umass.edu/careers then CLICK ON CAREERCONNECT |
| ON-CAMPUS RECRUITING | One of the primary ways companies recruit for technical positions. This includes Career Fairs, Networking events and company sponsored information sessions, tech talks, workshops and resume drop tabling. Check the Engineering Career Center events calendar at http://engineering.umass.edu/current-students/career-development/events |
| INTERNET | Search company websites and industry specific online job banks. |
| NETWORKING | Talk to everyone you know to develop contacts; ask for information on jobs/companies/industries and circulate your resume. You may learn of unadvertised openings or get a courtesy interview. |
| SOCIAL MEDIA | LinkedIn, Facebook, Twitter. Follow your favorite companies and check for job openings. Complete your LinkedIn profile and highlight your technical skills/experience and display an appropriate photo. Perform a search on your name to review your internet presence, clean up results if necessary. |
Energize Your Career

Guardian of the grid
ISO New England is the independent, not-for-profit corporation that ensures the constant availability of electricity across the six states of New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

What we offer
The ISO offers internships, cooperative education assignments, and full-time positions in various engineering and business disciplines. These opportunities provide qualified candidates with an excellent platform for professional growth and developing career credentials.

You’ll be involved from day one in meaningful projects that will expand your technical, business, and communication skills. At ISO New England, the outcome of your work has a real impact on the lives of millions of people.

Current students
For internships and co-ops, we recruit students with the following majors:

- Electrical/Power Engineering
- Mechanical Engineering
- Industrial Engineering
- Computer Science
- Economics
- Accounting, Finance
- Communications

New graduates
Find the perfect work environment for collaborating with some of the industry’s brightest minds and applying classroom theory to real-world situations. A state-of-the-art campus conveniently located in Holyoke, MA, excellent benefits, and dedicated colleagues make ISO New England an ideal place to build a meaningful career.

CHOOSING BETWEEN JOB OFFERS

The first question many of your friends will ask when you receive a job offer is “What does it pay?” For many college graduates this consideration is near the top of the list, which is not surprising. Most students have invested thousands of dollars in their education, often racking up high student loan balances. Most graduates are looking forward to paying off that debt. Also, the value of a salary is easy to understand; the more zeroes after the first digit, the better.

In order to evaluate a salary offer you need to know what the average pay scale is for your degree and industry. The National Association of Colleges and Employers (NACE) is a good source of salary information for entry-level college graduates. Their annual Salary Survey should be available in your campus career center. Make sure you factor cost-of-living differences when considering salary offers. For example, you may need an offer of $76,000 in San Francisco to equal an offer of $40,000 in Huntsville, Ala.

Bonuses and commissions are considered part of your salary, so take them into consideration when evaluating an offer. It’s also important to have a good understanding of an employer’s policies concerning raises. Be sure to never make your decision on salary alone. Students tend to overemphasize salary when considering job offers. Money is important, but it’s more important that you like your job. If you like your job, chances are you’ll be good at it. And if you’re good at your job, eventually you will be financially rewarded.

Factor in Benefits

Of course, salary is only one way in which employers financially compensate their employees. Ask anybody with a long work history and they’ll tell you how important benefits are. When most people think of employer benefits, they think of things like health insurance, vacation time and retirement savings. But employers are continually coming up with more and more creative ways to compensate their workers, from health club memberships to flextime. The value of a benefits plan depends on your own plans and needs. A company gym or membership at a health club won’t be of much value to you if you don’t like to sweat.

Who’s the Boss?

Who you work for can have as much bearing on your overall job satisfaction as how much you earn and what you do. First, analyze how stable the potential employer is. If the company is for-profit, what were its earnings last year? What are its projections for growth? If the job is with a government agency or a nonprofit, what type of funding does it have? How long has the employer been around? You could receive the best job offer in the world, but if the job is cut in six months, it won’t do you much good.

Corporate Culture

There are three aspects to a work environment: 1) the physical workspace, 2) the “corporate culture” of the employer, and 3) fellow co-workers. Don’t underestimate the importance of a good workspace. If you are a private person, you probably will not be able to do your best work in a cluster of cubicles. If you are an extrovert, you won’t be happy shut in an office for hours on end.

Corporate culture comprises the attitudes, experiences, beliefs and values of an organization. What’s the hierarchy of the organization? Is there a dress code? Is overtime expected? Do they value creativity or is it more important that you follow protocol? Whenever possible, you should talk to current or previous employees to get a sense of the corporate culture. You may also be able to get a sense of the environment during the interview or by meeting your potential boss and co-workers during the interview process. Ask yourself if the corporate culture is compatible with your own attitudes, beliefs and values.

Your boss and fellow co-workers make up the last part of the work environment. Hopefully, you will like the people you work with, but you must, at least, be able to work well with them professionally. You may not be able to get a good sense of your potential co-workers or boss during the interview process. But if you do develop strong feelings one way or the other, be sure to take them into consideration when making your final decision.

Like What You Do

Recent college graduates are seldom able to land their dream jobs right out of school, but it’s still important that you at least like what you do. Before accepting a job offer, make sure you have a very good sense of what your day-to-day duties will be. What are your responsibilities? Will you be primarily working in teams or alone? Will your job tasks be repetitive or varied? Will your work be challenging? What level of stress can you expect with the position?

Location, Location, Location

Climate, proximity to friends and family and local population (i.e., urban vs. rural) should all be evaluated against your desires and preferences. If you are considering a job far away from your current address, will the employer pay for part or all of your moving expenses? Even if you are looking at a local job, location can be important—especially as it relates to travel time. A long commute will cost you time, money and probably more than a little frustration. Make sure the tradeoff is worth it.

Time is on Your Side

It’s acceptable to request two or three days to consider a job offer. And depending on the employer and the position, even a week of consideration time can be acceptable. If you’ve already received another offer or expect to hear back from another employer soon, make sure you have time to consider both offers. But don’t ask for too much time to consider. Like all of us, employers don’t like uncertainty. Make sure you give them an answer one way or another as soon as you can.

It’s Your Call

Once you make a decision, act quickly. If you are accepting a position, notify the hiring manager by phone followed by a confirmation letter or an email. Keep the letter short and state the agreed upon salary and the start date. When rejecting an offer, make sure to thank the employer for their time and interest. It always pays to be polite in your correspondence. You never know where your career path will take you and it might just take you back to an employer you initially rejected.

Federal Jobs: Working for Uncle Sam

So you want to work for the federal government? You are not alone. Uncle Sam employs approximately 2.7 million civilian workers worldwide. Federal employees receive a generous benefits package, and as of 2012 they earned an average salary of $81,709. As the largest employer in the U.S., the federal government offers a variety of career opportunities unparalleled in the private sector. Federal employees work with (and create) cutting-edge technology. They create policy, programs and services that impact the health, safety and welfare of millions of people worldwide.

But with these benefits come bureaucracy. If you do not like working within a system and following a defined chain of command, a federal job might not be for you. This bureaucracy is evident in the hiring process as well. Federal agencies follow strict hiring procedures, and applicants who do not conform to these procedures are left by the wayside. Typically, the federal hiring process can stretch on for months. In fact, many career professionals recommend that students applying for federal jobs begin the process at least two semesters before their graduation date.

Types of Federal Jobs

Federal jobs are separated into two classes: competitive service and excepted service positions. Competitive service jobs, which include the majority of federal positions, are subject to civil service laws passed by Congress. Job applications for competitive service positions are rated on a numerical system in which applications are awarded points based on education, experience and other predetermined job qualification standards. Hiring managers then fill the position from a pool of candidates with the highest point totals.

Hiring managers for excepted service agencies are not required to follow civil service hiring procedures or pick from a pool of candidates who have been rated on a points system. Instead, these agencies set their own qualifications requirements, as occurs in private industry. However, both competitive service and excepted service positions must give preference to veterans who were either disabled or who served in combat areas during certain periods of time. The Federal Reserve, the Central Intelligence Agency and the National Security Agency are examples of some excepted service agencies. It’s important to note that even agencies that are not strictly excepted service agencies can have excepted service positions available within them.

OPM and USAJOBS

The U.S. Office of Personnel Management (OPM) acts as the federal government’s human resources agency. OPM’s website (opm.gov) is expansive and contains a wealth of information for anyone interested in federal jobs, including federal employment trends, salary ranges, benefits, retirement statistics and enough links to publications and resources to keep a research librarian busy for days. Linked to the OPM site is the USAJOBS site (usajobs.gov), which has its own set of tools and resources that will be familiar to any standard job site user. USAJOBS acts as a portal for federal employment with thousands of job listings at any one time.

Searching for Federal Jobs

Federal agencies now fill their jobs like private industry by allowing applicants to contact the agency directly for job information and applications. However, most of these positions can be accessed through the USAJOBS site. All competitive service positions must be posted on the USAJOBS site, and although agencies are not required to post their excepted service positions on USAJOBS, many do.

Registered visitors to USAJOBS can create and post up to five resumes, which can be made searchable, allowing recruiters from federal agencies to find resumes during applicant searches. Applicants can also use these resumes to apply directly to jobs that have an online application option. In addition, job applicants can create as many as ten “search agents,” which search for job openings using certain criteria (such as location, job type, agency, salary requirements), and email matching postings directly to their inbox. Applicants can also search for jobs directly using the “search jobs” button on the USAJOBS homepage.

Remember, excepted service positions are not required to be posted on the USAJOBS site. If you are interested in employment with an excepted service agency, be sure to visit the recruitment section of its website for postings that may not have made it onto the USAJOBS site. It is often worthwhile to look at the sites of agencies that you do not associate with your field of study. If you are interested in the environment, you should definitely visit the EPA’s website. But you should also make sure to visit the websites of other agencies that you don’t associate with your major. It’s not unusual for a biology major, for example, to find a job with Homeland Security or the Department of Defense.

How to Apply

There is no general way to submit an application to OPM or to individual federal agencies. Instead, students should refer to each job posting for specific directions. Whether for competitive service or excepted service positions, federal job postings can be intimidating. A typical posting can run over 2,000 words and include sections on eligibility requirements, educational requirements, necessary experience, salary range, job duties and even a description of how applicants are evaluated.

Most importantly, all federal job postings include a section titled “How to Apply.” Instead of letting this avalanche of information overwhelm you, use it as a resource to help you put together the best application possible, paying particularly close attention to the “How to Apply” section. If you do not follow the instructions and procedures closely, your application may not be processed. “I would emphasize that applicants should carefully read the ‘fine print’ of all printed and online materials and applications,” says Dr. Richard White, Employer Relations Coordinator, Drew University. “Applicants who do all their i’s and cross all their t’s gain a competitive advantage and rise to the top of the application pool.”

Federal agencies require specific information on your resume before it can be processed. The OPM created the USAJOBS Resume Builder in an effort to help applicants create a resume which can be used for most government agencies—go to my.usajobs.gov to get started. Agencies may also request that you submit additional forms for application (many of which are available on USAJOBS). Strictly following the “How to Apply” instructions will ensure that your application has all the information necessary.

INTERNATIONAL STUDENTS AND THE JOB SEARCH

Visit UMass Career Services international job board called Going Global at www.umass.edu/careers.

Looking for a job is seldom easy for any student. For you, the international student, the job search process can be especially confusing. You may lack an understanding of U.S. employment regulations, or perhaps you are unaware of the impact your career choice has on your job search. You may also be unsure about your role as the job-seeker and the resources used by American employers to find candidates.

The following is an overview of the issues most relevant to international students in developing a job search strategy. Additional information about the employment process and related topics can be found through your career center and on the Internet.

Bureau of U.S. Citizenship and Immigration Services Regulations

As an international student, you should only obtain employment-related information from an experienced immigration attorney or your campus USCIS representative. Advice from any other resource may be inaccurate. Once you have decided to remain in the United States to work, contact the international student services office or the office of human resources on your campus and make an appointment with your USCIS representative. In addition to helping you fill out necessary forms, the USCIS representative will inform you of the costs associated with working in the United States.

Importance of Skills and Career Field

Find out if your degree and skills-set are currently in demand in the U.S. job market. An advanced degree, highly marketable skills or extensive experience will all make your job search easier. Find out what region of the United States holds the majority of the jobs in your field; you may need to relocate in order to find the job you want. Learn all you can about your targeted career field by talking to professors, reading industry publications and attending professional meetings and regional conferences.

Role of Employers

It is the employer’s responsibility to find the right people for his or her company—not to help you find a job. The interview is successful when both of you see a match between the employer’s needs and your interest and ability to do the job.

The employer (through hiring managers, human resources staff or employment agencies) will most likely use several resources to find workers, including:

- College recruiting
- Campus or community job fairs
- Posting jobs on the company website or on national job posting sites on the Internet
- Posting jobs in major newspapers or trade publications
- Resume searches on national online services
- Employee referrals
- Regional and national conferences
- Employment agencies (“headhunters”)

Are you accessible to employers through at least some of the above strategies? If not, develop a plan to make sure your credentials are widely circulated. Notify as many people as possible in your field about your job search.

Strong Communication Skills

You can help the employer make an informed hiring decision if you:

- Provide a well-prepared resume that includes desirable skills and relevant employment experiences.
- Clearly convey your interests and ability to do the job in an interview.
- Understand English when spoken to you and can effectively express your thoughts in English.
- It’s important to be able to positively promote yourself and talk with confidence about your education, relevant skills and related experiences. Self-promotion is rarely easy for anyone. But, it can be especially difficult for individuals from cultures where talking about yourself is considered inappropriate. When interviewing in the United States, however, you are expected to be able to explain your credentials and why you are suitable for the position.
- Be sensitive to the interviewer’s verbal and nonverbal cues. Some international students may not realize when their accent is causing them to be misunderstood. Interviewers are sometimes too embarrassed or impatient to ask for clarification, so be on the lookout for nonverbal clues, such as follow-up questions that don’t match your responses or sudden disinterest on the part of the interviewer. Also, make sure you express proper nonverbal communication; always look directly at the employer in order to portray confidence and honesty.

If your English language skills need some work, get involved with campus and community activities. These events will allow you to practice speaking English. The more you use the language, the more proficient you will become. These activities are also a great way to make networking contacts.

Career Center

The career center can be a valuable resource in your job search. Be aware, however, that some employers using the career center won’t interview students who are not U.S. citizens. Though this may limit your ability to participate in some campus interviews, there are numerous ways to benefit from the campus career center:

- Attend sessions on job search strategies and related topics.
- Work with the career services staff to develop your job search strategy.
- Attend campus career fairs and company information sessions to inquire about employment opportunities and to practice your networking skills.

It’s a good idea to get advice from other international students who have successfully found employment in this country and to start your job search early. Create and follow a detailed plan of action that will lead you to a great job you can write home about.

Written by Rosita Smith.
At some point in your college career, you must decide what you would like to do after graduation—and that includes whether or not to attend graduate school. If you’re trying to determine whether graduate school is right for you, here are some pointers to help you make an enlightened decision.

1. Should I consider going to graduate school?
   Going to graduate school might be a good idea if you…
   • want to be a professor, lawyer, doctor, or work in any profession that requires a post-secondary education.
   • wish to develop additional expertise in a particular subject or field to maximize your future earning potential and opportunities for career advancement.
   • are deeply interested in a particular subject and wish to study it in-depth—AND have the time and financial resources to devote to further education.

   Going to graduate school might not be a good idea if you…
   • are trying to delay your entry into the “real world” with real responsibilities and real bills.
   • are clueless about your career goals.
   • aren’t prepared to devote the time and hard work needed to succeed.
   • want to stay in school longer to avoid a poor job market.

2. Is it better to work first or attend graduate school immediately after I complete my undergraduate degree?
   Work first if...
   • you would like to get some real-world work experience before investing thousands of dollars in a graduate degree.
   • you cannot afford to go to graduate school now, and you haven’t applied for any scholarships, grants, fellowships and assistantships, which could pay for a great deal of your education.

   Go to graduate school now if...
   • you are absolutely sure you want to be a college professor, doctor, lawyer, etc., and need a graduate degree to pursue your dream job.
   • you have been awarded grants, fellowships, scholarships or assistantships that will help pay for your education.
   • you’re concerned that once you start earning real money, you won’t be able to return to the lifestyle of a “poor” student.
   • your study habits and mental abilities are at their peak, and you worry whether you’ll have the discipline (or motivation) to write papers and study for exams in a few years.

3. I am broke. How will I pay for tuition, books, fees and living expenses?
   • Most engineering PhD programs offer students a paid teaching assistantship or research assistantship. However, most engineering Master’s programs do not. Check with individual departments to make sure you know how they handle funding.
   • Student Loans: Even if you’ve taken out loans in the past, another $50,000 - $75,000 may be a sound “investment” in your future.
   • Fellowships/Scholarships: A free education is always the best option. The catch is you need a high GPA, good GRE/GMAT/LSAT/MCAT scores and the commitment to search out every possible source of funding.
   • Teaching/Research Assistantships: Many assistantships include tuition waivers plus a monthly stipend. It’s a great way to get paid for earning an education.
   • Employer Sponsorship: Did you know that some companies actually pay for you to continue your education? The catch is they usually expect you to continue working for them after you complete your degree so they can recoup their investment.

4. What are the pros and cons of going to graduate school full-time vs. part-time?
   Benefits of attending graduate school full-time:
   • you’ll be able to complete your degree sooner.
   • you can totally commit your intellectual, physical and emotional energy to your education.
   • ideal if you want to make a dramatic career change.

   Benefits of attending graduate school part-time:
   • work income helps pay for your education.
   • you can take a very manageable course load.
   • you can juggle family responsibilities while completing your degree.
   • allows you to work in the function/industry/career of your choice while continuing your education.
   • employer will often pay for part (or all) of your graduate degree.

5. Assuming I want to go to graduate school in the near future, what should I do now?
   a. Identify your true strengths, interests and values to help you discover what is right for YOU—not your friends or parents.
   b. Keep your grades up and sign up (and prepare) to take the required standardized tests.
   c. Talk to faculty, friends and family who have gone to graduate school to get their perspective about the differences between being an undergraduate and a graduate student.
   d. Talk to faculty, friends and family who are in your targeted profession to get a realistic sense of the career path and the challenges associated with the work they do.
   e. Investigate creative ways to finance your education—by planning ahead you may reduce your debt.
   f. Research graduate schools to help you find a good match.
   g. Investigate the admissions process and the current student body profile of your targeted schools to evaluate your probability for admission.
   h. Have faith and APPLY! Remember, you can’t get in unless you apply.

Written by Roslyn J. Bradford.
GUIDELINES FOR WRITING YOUR PERSONAL STATEMENT

STEP 1: Brainstorming

**Actions:**
- Devote time to reflect on the following questions.
- Discuss them with friends or family members.
- Jot down notes. In some cases write sentences.
- Think about the flip side of each question. For example, why are you really committed to the field of biology despite pressure from your parents to become a lawyer or to get a job?

**Your answers to some of these questions will form the heart of your personal statement.**

1. How did your pre-college education influence your decision to pursue graduate study in your field?
   - **Think about:** High school courses, teachers, special, programs, student organizations, and community or volunteer work.

2. How has your college experience influenced your decision?
   - **Think about:** College courses, professors, academic interests, research, special programs, student organizations, and the decision-making process you went through to choose your major.

3. How has your work experience influenced your decision?
   - **Think about:** Internships, externships, part-time jobs, summer jobs, and volunteer or community work.

4. Who has had the most influence on your decision to pursue graduate study? In what ways?
   - **Think about:** Parents, relatives, teachers, professors, clergy, friends of the family, college friends, parents of friends, local merchants, supervisors, coaches, doctors, dentists, lawyers, etc.

5. What situation has had the most influence on your decision?
   - **Think about:** Family, academic, work or athletic situations. Think about happy, sad, traumatic, moving, or memorable situations.

6. What personally motivates you to pursue graduate study in this field?
   - **Think about:** Your personal skills, interests, and values.

STEP 2: Writing Your Personal Statement

**Actions:**
- Incorporate your responses to the above questions. Begin writing your first draft:
  1. Develop an outline of your statement prior to writing. It doesn’t have to be detailed. It can be three or four main points in the order you want to make them.
  2. Accentuate your strengths and what makes you unique.
  3. Explain your weaknesses in positive ways. For example, refer to them not as weaknesses but as areas for improvement or growth.
  4. Paint pictures and tell stories about what makes you special. In this way the admissions readers will remember you. The story can be happy or sad. The more feeling you can inject into your statement, the more you will stand out.
  5. Find out the specific orientation and philosophy of the graduate program. Adapt and refine your statement to fit. This will make you stand out from other applicants who recycle the same personal statement with each application.

**Suggested Outline**

Your personal statement will likely range from 250-1200 words or 1-6 pages. The typical personal statement should be 2-3 double-spaced pages or 500-700 words. Here is a suggested outline. You should adjust the main point of each paragraph and number of paragraphs depending on the desired length of your personal statement and the areas in your background that you choose to emphasize.

- **Paragraph 1:** A personal human-interest story
- **Paragraph 2:** Your academic interests and achievements
- **Paragraph 3:** Your relevant work and/or research experiences
- **Paragraph 4:** Your career interests
- **Paragraph 5:** Why you are interested in this particular school
- **Paragraph 6:** The qualities you will bring to this school

**References**

Write for Success: Preparing a Successful Professional School Application, Third Edition, October 2005 by Evelyn W. Jackson, PhD and Harold R. Bardo, PhD. NAAHP, National Association of Advisors for the Health Professions, Inc.

**Personal Statement Critiques**

Contact your campus career office and make an appointment with a career counselor to have your personal statement critiqued. Ask a professor if they would review it as well. Having feedback from professionals with different points of view can only make for a stronger personal statement overall.

Adapted with permission from the Office of Career Services at Rutgers University, New Brunswick Campus.
LETTERS OF RECOMMENDATION

Candidates for employment, graduate school, scholarships or any activity for which others will evaluate their talents and abilities will need to request letters of recommendation. The content and quality of these letters, as well as the caliber of the people who write them, are critical to the selection process.

Selecting People to Serve as References
Select individuals whom you feel are knowledgeable of your skills, work ethic, talents and future capacity. The selection of your references is critical, as a reference that is ill-informed could sabotage all the great work you have done in a matter of minutes. Choose people who have known you for a minimum of six months. The longer they have known you the better, but they must have had regular contact with you to observe your growth and development. A reference from someone who may have known you several years ago but you have not spoken to in a year or more is not in a position to critique your skills.

If you must choose between several people, select those who know you the best but who also hold a higher rank in their profession. A department head is a better candidate than a graduate assistant or an instructor. Never choose someone on status alone, continue to choose people based on how well they know you and how much they want to assist you in your job search. Do not choose people who are not committed to you or who are not very familiar with your background.

Try to Meet Face to Face
Never assume someone will want the responsibility to serve as your reference. Make an appointment to discuss your career goals and purpose of the letter of recommendation. Determine if the person would want the responsibility of serving as your reference, which involves not only writing a letter supporting your skills, but also handling any phone inquiries and responding to other questions which may be posed by a selection committee. Persons who serve as a reference have responsibilities that go beyond the words they put on paper. They should feel strongly about your success and desire to do whatever they can to assist you in reaching your goals. You have come too far to let someone jeopardize your future.

A personal meeting is always best because you can observe your potential reference’s body language to see how interested he or she is in assisting you. A slow response to a question or a neutral facial expression may be this person’s way of trying to show you that he/she doesn’t feel comfortable serving as your reference. Trust your instincts. If you don’t feel that you want to pursue this person as a reference you are not required to inform them of your decision. At any rate, always thank the person and end the meeting on a positive note.

Help Them Help You
You must assist your reference-givers so they can do the best job possible. Provide them with a copy of your current resume, transcript, job descriptions for the type of employment you desire or other detailed information related to the purpose of the letter. Provide a one-page summary of any achievements or skills exhibited with the person who will be writing the letter. They may not remember everything you did under their supervision or time spent with you. Finally, provide them with a statement of future goals outlining what you want to accomplish in the next few years.

An employer will interview you and then contact your references to determine consistency in your answers. You should not inflate what you are able to do or what you may have completed in work or school assignments. A reference is looked upon as someone who can confirm your skill and ability level. Any inconsistencies between what you said in your interview and a reference’s response could eliminate you from further consideration. The key is to keep your references informed of what you are going to be discussing with employers so there is a clear understanding of what is valued by the employer.

What’s the Magic Number?
Each situation will dictate the appropriate number of references that will be required. The average would be three to five letters of recommendation. Generally, references are people whom you have known professionally; they should not be family or friends. When selecting people as references, choose people who know you well and have the most to say pertaining to the purpose of the letter. One person may be very appropriate for a reference for employment, while another would be best for use in admission to graduate or professional school or a scholarship application.

Encourage your reference to use strong, descriptive words that provide the evidence of your interpersonal skills initiative, leadership, flexibility, conflict resolution, decision-making, judgment, oral and written communication skills, and grasp of your field of study. Education majors are encouraged to request a letter from the cooperating teacher, supervising teacher, professor(s) in your major, and a current or former employer.

Maintain Professional Courtesy
Give your reference writers ample time to complete their letters and provide a self-addressed stamped envelope. Make it as easy for them as possible so they don’t have to spend valuable time searching for the proper return address and a stamp. Follow up with your letter writers and let them know the status of your plans and search. They will want to know how you are doing and whether there is anything else they may do to increase your candidacy. You never know when you will need their assistance again, and it is just good manners to keep those who care about you informed of your progress. Finally, many times when two or more candidates are considered equally qualified, a strong letter of reference can play an important role in determining who is selected for the position.

Maintaining a good list of references is part of any professional’s success. Continue to nurture valuable relationships with people who will want to do whatever they can to aid in your success. Your personal success is based on surrounding yourself with positive people who all believe in you. No one makes it alone; we all need a little help from our friends.
