Internship Opportunity - NPI

Are you studying a science, math, engineering or technology discipline? Are you interested in a summer, semester or year-long internship?

The Microcal Products group at Malvern Instruments in Northampton Massachusetts is looking for a summer intern to participate in development of our evolving line of calorimetry products. The successful candidate(s) will join a diverse team of biophysical chemists, electrical, and mechanical engineers and work on project-driven tasks for a summer or longer period.

We are seeking an engaged individual who is eager to participate as a contributing group member. Duties may include literature research, instrument testing, design/assembly testing, and laboratory work.

Here at Malvern Instruments, we can help you to grow both professionally and personally in an innovative, diverse and stimulating environment, giving you the opportunity to experience product development, operational manufacturing and product support whilst you make a meaningful contribution to project work.

To apply send your resume and cover letter via e-mail to recruitment-usa@malvern.com. Please include Microcal Intern in the subject line.

Malvern is an ethical employer and we ask candidates not to share confidential information about other organizations, including their current employer, during any interview for a position within our organization.”
