Hologic, Inc.

Intern, Engineering – 160678, Marlborough, MA

Hologic, Inc. is a leading developer, manufacturer and supplier of premium molecular diagnostic products and services that are used to diagnose human diseases, screen donated human blood and to aid in biomedical research. Hologic is also a leader in the development, manufacturing and sales of medical imaging systems and biopsy devices as well as surgical and treatment products, with an emphasis on serving the healthcare needs of women. Our business is dedicated to impacting the lives of people across the globe through the early detection of disease, improved diagnosis and less invasive treatments.

There has never been a more exciting time to join us. Bright people, working together to pioneer advances in human health care, have created Hologic's success. Our company believes that people are our greatest asset and only by recruiting, hiring, developing and retaining the most talented employees can we continue to be successful. Our work atmosphere is stimulating, innovative and customer focused. We provide employees with state-of-the art tools and technology, a collaborative and passionate work environment and the ability to make a dramatic difference in the world of healthcare.

We are rapidly growing and yet we have never been more focused – on our people, on our growth, on our future.
