Labsphere is the industry leader in light measurement technology providing optical measurement solutions to a global customer base for over 35 years. Labsphere’s success stems from a culture that recognizes and rewards achievement, innovation, and a fierce dedication to customer service. As a subsidiary of Halma plc, Labsphere is committed to protecting and improving the quality of life for people worldwide.

Labsphere is seeking to hire an Electrical Engineer to join our engineering team in North Sutton, New Hampshire. The successful candidate, in this position, will work under the direction of a Senior Electrical Engineer who has broad system experience specifying/designing/integrating analog, digital and power supply designs. In this role, he/she will be responsible for providing electrical engineering support to manufacturing on existing designs, and will be tasked with broad, new design challenges to support custom system orders, new OEM products and new standard products.

Desired Skills and Experience

- 0-5 years experience with a solid technical understanding of fundamentals governing sound Analog Circuit design, Digital Electronic design and power supplies.
- Experienced in schematic capture and PCB layout (Altium)
- Micro-processor design and firmware knowledge
- Solid understanding of best documentation practices for manufacturing/production designs.
- Able to work individually and in a team environment
- Knowledge of photonics/electro-optics a plus
- General CAD knowledge (SolidWorks) a plus

Qualifications:
- BSEE
- US Citizen

Labsphere is located in the beautiful Lake Sunapee region of New Hampshire. Our modern 85,000 square foot facility, nestled in the mountains, provides a unique quality of life where four season outdoor and cultural activities abound.
