Vanderweil Engineers

Transmission & Distribution - Paid Summer Internship

Vanderweil Engineers is looking for a summer intern to work in the transmission line and/or substation engineering departments on various utility-based client projects and to contribute to the design and engineering for existing facilities and new construction sites. The intern will use CADD and engineering tools to produce physical layouts, material lists, specifications, and various drawings for these projects. The intern will work closely with staff engineers, attend meetings as needed, visit worksites to collect information and see the engineering in person.

Prior experience with AutoCAD or Microstation is required and an interest in high voltage technology is preferred. Electrical or civil/structural engineering students in their junior year are preferred.

Candidates should send their résumé to the Director of Transmission & Distribution, Andres Molina. AMolina@Vanderweil.com
